bookdown Yihui Xie 2016-12-12 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

Nuns Having Fun Maureen Kelly 2008-05-28 Hallelujah, it's a book! After proving itself to be the "funniest calendar of the year" (according to Gene Shalit), "irresistible" (USA Weekend), and "habit-forming" (Maxim magazine), the Nuns Having Fun calendar has inspired Nuns Having Fun, a book of endearing nuttiness. Catholic kitsch doesn't get any funnier. Written by Maureen Kelly and Jeffrey Stone, pitch-perfect co-authors of the nuns calendar and the New York Times bestseller Growing Up Catholic, Nuns Having Fun features hundreds of sisters in full habit, cutting loose and having a hoot. Here are nuns in the surf ("This is even more fun than walking on water"), nuns in bumper cars ("We brake for Jesus"), nuns in a beer hall ("Ale Marys"), and nuns in the museum, huddled in front of a study of nudes ("It's okay to open your eyes. Sister Wendy says it's art"). There are nuns on skates, at bat, at the theater, skeet shooting (nuns with guns!), even hitting the slots (you know it's for a good cause). The 125 images are from the 1950s and '60s, black-and-white and possessing a pure retro charm; the written material is all-new. Drawing on their years as parochial school students, the authors explore the lore and legends surrounding nuns, including Favorite Punishments from Nuns, Nuns Say the Darndest Things, How to Recognize a Nun After Vatican II, a Wimple Watch, and List of People Who Could Have Been Nuns. As Sister says, "To err is human. To laugh is divine."

CUCKOO'S EGG Clifford Stoll 2012-05-23 Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

The Managerial Imperative and the Practice of Leadership in Schools Larry Cuban 1988-01-01 With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, "managerial behavior" results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource--an insightful introduction for those just entering the field and a fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

Introduction to Probability Charles Miller Grinstead 2012-10 This text is designed for an introductory probability course at the university level for sophomores, juniors, and seniors in mathematics, physical and social sciences, engineering, and computer science. It presents a thorough treatment of ideas and techniques necessary for a firm understanding of the subject. The text is also recommended for use in discrete probability courses. The material is organized so that the discrete and continuous probability discussions are presented in a separate, but parallel, manner. This organization does not emphasize an overly rigorous or formal view of probability and therefore offers some strong pedagogical value. Hence, the discrete discussions can sometimes serve to motivate the more abstract continuous probability discussions. Features: Key ideas are developed in a somewhat leisurely style, providing a variety of interesting applications to probability and showing some nonintuitive ideas. Over 600 exercises provide the opportunity for practicing skills and developing a sound understanding of ideas. Numerous historical comments deal with the development of discrete probability. The text includes many computer programs that illustrate the algorithms or the methods of computation for important problems. The book is a beautiful introduction to probability theory at the beginning level. The book contains a lot of examples and an easy development of theory without any sacrifice of rigor, keeping the abstraction to a minimal level. It is indeed a valuable addition to the study of probability theory. --Zentralblatt MATH

The Doll's House M. J. Arlidge 2015-02-12 Sunday Times Top Ten bestseller The Doll's House is the new twisting and terrifying thriller in the Detective Inspector Helen Grace series from M.J. Arlidge. Arlidge is the author of Eeny Meeny and Pop Goes the Weasel, and has been dubbed 'the new Jo Nesbo'. 'Detective Inspector Helen Grace is one of the greatest heroes to come along in years.' Jeffery Deaver, New York Times bestselling author of The Skin Collector and Solitude Creek 'The third instalment in the DI Grace series is as fast-paced and nail-bitingly tense as the first two. Taut and gripping, book four cannot come soon enough' Sun ***** A young woman wakes up in a cold, dark cellar, with no idea how she got there or who her kidnapper is. So begins her terrible nightmare. Nearby, the body of another young woman is discovered buried on a remote beach. But the dead girl was never reported missing - her estranged family having received regular texts from her over the years. Someone has been keeping her alive from beyond the grave. For Detective Inspector Helen Grace it's chilling evidence that she's searching for a monster who is not just twisted but also clever and resourceful - a predator who's killed before. And as Helen struggles to understand the killer's motivation, she begins to realize that she's in a desperate race against time . . . PRAISE FOR M.J.

ARLIDGE: 'Page-turningly chilling' The Times 'DI Helen Grace is a genuinely fresh heroine ... MJ Arlidge weaves together a tapestry that chills to the bone'Daily Mail 'M.J. Fragment-Based Drug Discovery Steven Howard 2015-07-03 Fragment-based drug discovery is a rapidly evolving area of research, which has recently seen new applications in areas such as epigenetics, GPCRs and the identification of novel allosteric binding pockets. The first fragment-derived drug was recently approved for the treatment of melanoma. It is hoped that this approval is just the beginning of the many drugs yet to be discovered using this fascinating technique. This book is written from a Chemist's perspective and comprehensively assesses the impact of fragment-based drug discovery on a wide variety of areas of medicinal chemistry. It will prove to be an invaluable resource for medicinal chemists working in academia and industry, as well as anyone interested in novel drug discovery techniques.

Speaking of Faith Krista Tippett 2008-01-29 A thought-provoking, original appraisal of the meaning of religion by the host of public radio's *On Being* Krista Tippett, widely becoming known as the Bill Moyers of radio, is one of the country's most intelligent and insightful commentators on religion, ethics, and the human spirit. With this book, she draws on her own life story and her intimate conversations with both ordinary and famous figures, including Elie Wiesel, Karen Armstrong, and Thich Nhat Hanh, to explore complex subjects like science, love, virtue, and violence within the context of spirituality and everyday life. Her way of speaking about the mysteries of life-and of listening with care to those who endeavor to understand those mysteries--is nothing short of revolutionary.

She is not only a gifted writer, but an absolutely essential one.” —The New York Times Book Review

Behemoth: A History of the Factory and the Making of the Modern World Joshua B. Freeman 2018-02-27 “Freeman's rich and ambitious Behemoth depicts a world in retreat that still looms large in the national imagination.... More than an economic history, or a chronicle of architectural feats and labor movements.”—Jennifer Szalai, New York Times In an accessible and timely work of scholarship, celebrated historian Joshua B. Freeman tells the story of the factory and examines how it has reflected both our dreams and our nightmares of industrialization and social change. He whisks readers from the early textile mills that powered the Industrial Revolution to the factory towns of New England to today's behemoths making sneakers, toys, and cellphones in China and Vietnam. Behemoth offers a piercing perspective on how factories have shaped our societies and the challenges we face now.

Dotty and the Chimney Thief Emma Warner-Reed 2016 All is not well in the world of The Calendar House. There's a rogue sweep on the loose, and they're not just stealing trinkets from the houses they enter, they're stealing the chimneys, too! To add insult to injury, little Joe Raman from the corner shop on Dotty's beloved Wyvern Road has gone missing and nobody knows

why. It appears Dotty has a lot to contend with. The Council of Sweeps are looking for answers but it seems there aren't any to be found. Has Joe been abducted by thieves, or is there another reason for his disappearance? And can the Chimney Thief be stopped, before all the portals into the world of the ordinary folk have been sealed - forever.? What readers have to say about DOTTY and the Chimney Thief: "I read [the first chapter] to the children tonight and they were instantly back to being as gripped as they were by the first book. They both laughed out loud at the wonderful descriptions of Gobby in the kitchen covered in flour (again) and the way she asked Kenny to remove Geoff! They cannot wait to find out what happens next." S. Johnson, Stallingborough "What a thoroughly enjoyable read this series is turning out to be. The Calendar House world is definitely a place worth visiting and revisiting. Dotty the perfect protagonist with more than two dimensions to her character is sassy, brave and very curious. Just the sort of traits the best of adventurers require to step out into the unknown. There are a lot of children's books out there but very few can entertain all ages. Parents reading "just one more chapter" to their sleepy children will particularly enjoy reciting this as a bedtime story. As for their children... They will wallow in the luxurious imagery created by Emma Warner-Reed. 5 stars." Paul Douglas Lovell, Goodreads ?
