How to Create a Vegan World Tobias Leenaert 2017 In this thought-provoking book, Tobias Leenaert leaves well-trodden animal advocacy paths and takes a fresh look at the strategies, objectives, and communication of the vegan and animal rights movement. He argues that, given our present situation, with entire societies dependent on using animals, we need a very pragmatic approach. How to Create a Vegan World contains many valuable ideas and insights for both budding advocates for animals and seasoned activists, organizational leaders, and even entrepreneurs.

What We Owe the Future William MacAskill 2022-08-16 “This book will change your sense of how grand the sweep of human history could be, where you fit into it, and how much you could do to change it for the better. It's as simple, and as ambitious, as that.” —Ezra Klein An Oxford philosopher makes the case for “longtermism” — that positively influencing the long-term future is a key moral priority of our time The fate of the world is in our hands. Humanity’s written history spans only five thousand years. Our yet-unwritten future could last for millions more – or it could end tomorrow. Astonishing numbers of people could lead lives of great happiness or unimaginable suffering, or never live at all, depending on what we choose to do today. In What We Owe The Future, philosopher William MacAskill argues for longtermism, that idea that positively influencing the distant future is a key moral priority of our time. From this perspective, it’s not enough to reverse climate change or avert the next pandemic. We must ensure that civilization would rebound if it collapsed; counter the end of moral progress; and prepare for a planet where the smartest beings are digital, not human. If we put humanity’s course to right, our grandchildren’s grandchildren will thrive, knowing we did everything we could to give them a world full of justice, hope and beauty.

10 Career Essentials Donna Dunning 2010-12-15 There are many books to help you choose a career, but few to help you excel in the workplace once you are working. Over the course of a lifetime, people can spend 80,000 hours on the job. With this much time invested, author Donna Dunning asserts that your career should be interesting, motivating and rewarding. And in our competitive, rapidly changing society, you need to know how to be effective and competent at work or you may find yourself unemployed or passed over for promotion. Focusing on day-to-day behaviour and providing practical tips and strategies, 10 Career Essentials becomes your personal career coach by showing you how to work effectively, get recognition and steer your career in the direction you want to go. The ideas such as optimizing your outlook, exceeding expectation and thriving in uncertainty may sound simple, but applying them takes skill and practice. 10 Career Essentials provides the key self-assessment tools and tips to stimulate learning and improve your

ability to implement your personal career strategy to its fullest.

Effective Altruism Hilary Greaves 2019-09-12 This is the first collective study of the thinking behind the effective altruism movement. This movement comprises a growing global community of people who organise significant parts of their lives around the two key concepts represented in its name. Altruism is the idea that if we use a significant portion of the resources in our possession—whether money, time, or talents—with a view to helping others then we can improve the world considerably. When we do put such resources to altruistic use, it is crucial to focus on how much good this or that intervention is reasonably expected to do per unit of resource expended (as a gauge of effectiveness). We can try to rank various possible actions against each other to establish which will do the most good with the resources expended. Thus we could aim to rank various possible kinds of action to alleviate poverty against one another, or against actions aimed at very different types of outcome, focused perhaps on animal welfare or future generations. The scale and organisation of the effective altruism movement encourage careful dialogue on questions that have perhaps long been there, throwing them into new and sharper relief, and giving rise to previously unnoticed questions. In this volume a team of internationally recognised philosophers, economists, and political theorists present refined and in-depth explorations of issues that arise once one takes seriously the twin ideas of altruistic commitment and effectiveness.

Doing Good Better William MacAskill 2016-08-02 An up-and-coming visionary in the world of philanthropy and a cofounder of the effective altruism movement explains why most of our ideas about how to make a difference are wrong and presents a counterintuitive way for each of us to do the most good possible. While a researcher at Oxford, William MacAskill decided to devote his study to a simple question: How can we do good better? MacAskill realized that, while most of us want to make a difference, we often decide how to do so based on assumptions and emotions rather than facts. As a result, our good intentions often lead to ineffective, sometimes downright harmful, outcomes. As an antidote, MacAskill and his colleagues developed effective altruism—a practical, data-driven approach to doing good that allows us to make a tremendous difference regardless of our resources. Effective altruists operate by asking certain key questions that force them to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. In Doing Good Better, MacAskill lays out these principles and shows that, when we use them correctly—when we apply the head and the heart to each of our altruistic endeavors—each of us has the power to do an astonishing amount of good.

So Good They Can't Ignore You Cal Newport 2012-09-18 In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and

eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

You Turn Ashley Stahl 2021-01-26 If you're thinking about buying this book, it's probably because it feels like something's missing in your career. Guess what? It could be YOU. Whether you're living for the weekends or counting the minutes until 5 pm every day, life is too short to wish it away because you feel stuck in your job. The good news is that you have the power to stop living on autopilot and turn your career around. "Follow your passion," "find your purpose," and "do what you love" have joined the parade of bland directives that aren't doing much to actually help you figure out what you're meant to do with your career. Instead, they only create more confusion. If all we had to do is "follow our bliss" . . . why aren't we blissful yet? The truth is, the best career is not one where you only do what you love, but one where you honor who you are. In You Turn, counterterrorism professional turned career coach Ashley Stahl shares the strategies she's used to help thousands ditch their Monday blues, get clarity on what work lights them up, and devise an action plan to create a career they love. This book gives readers access to Stahl's coveted 11-step roadmap that has guided thousands of coaching clients in 31 countries to self-discovery and success. Throughout her process, you'll:

- Discover your Core Skillset. Uncover your gifts and talents to create an intentional career path that's fulfilling and aligned with who you are—and what you're good at.
- Understand your "Inner Money Blueprint." Discover the root of your money mindset, and how to break free of financial limitation.
- Clarify your Core Interests. Identify the difference between a passion, gift, and calling so you can get clear on what's meant to be a hobby and what's meant to be a career!
- Become your own coach. Walk away with a unique set of tools for staying true to your best self in times of stress, frustration, or anxiety. Whether you're considering a career pivot, or just curious about what else is possible for you, it's time to make a "you turn"—to get unstuck, discover your true self, and thrive (not just survive) in your career.

The Life You Can Save Peter Singer 2009-03-03 For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In The Life You Can Save, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. The Life You Can Save teaches us to be a part of the solution, helping others as we help ourselves.

The Effective Altruism Handbook Ryan Carey 2015-04-23 The Effective Altruism Handbook is a compilation of essays about how do more good with limited resources. It presents much of the intellectual progress of the effective altruism movement, a group dedicated to discovering and carrying out the most effective philanthropic interventions. It features a range of problems that we ask when considering how to have an impact, and many that we don't think to ask at all, across areas such as charity evaluation, career choice and cause selection. Its contributors include Professors Peter Singer and William MacAskill, who provide the introduction, and the leaders of a wide range of organisations, who discuss how they seek to put this movement's ideas into practice.

The Most Good You Can Do Peter Singer 2015-04-07 An argument for putting sentiment aside and maximizing the practical impact of our donated dollars: "Powerful, provocative" (Nicholas Kristof, The New York Times). Peter Singer's books and ideas have been disturbing our complacency ever since the appearance of Animal Liberation. Now he directs our attention to a challenging new movement in which his own ideas have played a crucial role: effective altruism. Effective altruism is built upon the simple but profoundly unsettling idea that living a fully ethical life involves doing the "most good you can do." Such a life requires a rigorously unsentimental view of charitable giving: to be a worthy recipient of our support, an organization must be able to demonstrate that it will do more good with our money or our time than other options open to us. Singer introduces us to an array of remarkable people who are restructuring their lives in accordance with these ideas, and shows how, paradoxically, living altruistically often leads to

greater personal fulfillment than living for oneself. Doing the Most Good develops the challenges Singer has made, in the New York Times and Washington Post, to those who donate to the arts, and to charities focused on helping our fellow citizens, rather than those for whom we can do the most good. Effective altruists are extending our knowledge of the possibilities of living less selfishly, and of allowing reason, rather than emotion, to determine how we live. Doing the Most Good offers new hope for our ability to tackle the world's most pressing problems.

The War of the Worlds H. G. Wells 2017-01-01 When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

Famine, Affluence, and Morality Peter Singer 2016 First published in 1972, Singer's essay argued that choosing not to send life-saving money to starving people on the other side of the earth is the moral equivalent of neglecting to save drowning children because we prefer not to muddy our shoes. In this publication, his essay is accompanied by other pieces on our obligations to others, as well as a new introduction that discusses Singer's current thinking.

Designing Your Life Bill Burnett 2016-09-20 #1 NEW YORK TIMES BEST SELLER • At last, a book that shows you how to build—design—a life you can thrive in, at any age or stage. Designers create worlds and solve problems using design thinking. Look around your office or home—at the tablet or smartphone you may be holding or the chair you are sitting in. Everything in our lives was designed by someone. And every design starts with a problem that a designer or team of designers seeks to solve. In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are. The same design thinking responsible for amazing technology, products, and spaces can be used to design and build your career and your life, a life of fulfillment and joy, constantly creative and productive, one that always holds the possibility of surprise.

80,000 Hours Benjamin J. Todd 2016-12-10 Find a fulfilling career that tackles the world's most pressing problems, using this guide based on five years of research alongside academics at Oxford. You have about 80,000 hours in your career: 40 hours a week, 50 weeks a year, for 40 years. This means your choice of career is one of the most important decisions you'll ever make. Make the right choices, and you can help solve some of the world's most pressing problems, as well as have a more rewarding, interesting life. For such an important decision, however, there's surprisingly little good advice out there. Most career advice focuses on things like how to write a CV, and much of the rest is just (misleading) platitudes like "follow your passion". Most people we speak to don't even use career advice - they just speak to friends and try to figure it out for themselves. When it comes to helping others with your career the advice usually assumes you need to work as a teacher, doctor, charity worker, and so on, even though these paths might not be a good fit for you, and were not what the highest-impact people in history did. This guide is based on five years of research conducted alongside academics at the University of Oxford. It aims to help you find a career you enjoy, you're good at, and that tackles the world's most pressing problems. It covers topics like:

1. What makes for a dream job, and why "follow your passion" can be misleading.
2. Why the most effective ways to make a difference aren't always the obvious ones like working at a charity, or becoming a doctor.
3. How to compare global problems, like climate change and education, in terms of their scale and urgency.
4. How to discover and develop your strengths. It's also full of practical tips and tools. You'll come away with a plan to use your 80,000 hours in a way that's fulfilling and high impact.

What people are saying "Based on evidence and good sense, not platitudes" - Steven Pinker, New York Times bestselling author
Johnstone Family Professor of Psychology at Harvard University. "This incredible group is helping people have a greater social impact with their careers." - Sue Desmond-Hellmann, CEO of the Bill and Melinda Gates Foundation. About the authors
80,000 Hours is an independent non-profit founded in Oxford in 2011. It performs research into career choice, and provides online and in-person advice. Benjamin Todd is the CEO and co-founder of 80,000 Hours. He grew the organization from a student society at Oxford to a non-profit that's raised \$1.3m in donations, and has 100,000 monthly readers. He has a Master's degree in Physics and Philosophy from Oxford, and speaks Chinese, badly. Ben is

advised by the rest of the 80,000 Hours team, including Professor Will MacAskill, author of *Doing Good Better*, co-founder of the Effective Altruism movement, and one of the youngest tenured professors of philosophy in the world.

The Scout Mindset Julia Galef 2021-04-13 "...an engaging and enlightening account from which we all can benefit."—The Wall Street Journal A better way to combat knee-jerk biases and make smarter decisions, from Julia Galef, the acclaimed expert on rational decision-making. When it comes to what we believe, humans see what they want to see. In other words, we have what Julia Galef calls a "soldier" mindset. From tribalism and wishful thinking, to rationalizing in our personal lives and everything in between, we are driven to defend the ideas we most want to believe—and shoot down those we don't. But if we want to get things right more often, argues Galef, we should train ourselves to have a "scout" mindset. Unlike the soldier, a scout's goal isn't to defend one side over the other. It's to go out, survey the territory, and come back with as accurate a map as possible. Regardless of what they hope to be the case, above all, the scout wants to know what's actually true. In *The Scout Mindset*, Galef shows that what makes scouts better at getting things right isn't that they're smarter or more knowledgeable than everyone else. It's a handful of emotional skills, habits, and ways of looking at the world—which anyone can learn. With fascinating examples ranging from how to survive being stranded in the middle of the ocean, to how Jeff Bezos avoids overconfidence, to how superforecasters outperform CIA operatives, to Reddit threads and modern partisan politics, Galef explores why our brains deceive us and what we can do to change the way we think.

10th Anniversary Edition *The Life You Can Save* Peter Singer 2019-12-01 In this Tenth Anniversary Edition of *The Life You Can Save*, Peter Singer brings his landmark book up to date. Strangers Drowning Larissa MacFarquhar 2016-09-27 What does it mean to devote yourself wholly to helping others? In *Strangers Drowning*, Larissa MacFarquhar seeks out people living lives of extreme ethical commitment and tells their deeply intimate stories; their stubborn integrity and their compromises; their bravery and their recklessness; their joys and defeats and wrenching dilemmas. A couple adopts two children in distress. But then they think: If they can change two lives, why not four? Or ten? They adopt twenty. But how do they weigh the needs of unknown children in distress against the needs of the children they already have? Another couple finds a leprosy colony in the wilderness in India, living in huts with no walls, knowing that their two small children may contract leprosy or be eaten by panthers. The children survive. But what if they hadn't? How would their parents' risk have been judged? A woman believes that if she spends money on herself, rather than donate it to buy life-saving medicine, then she's responsible for the deaths that result. She lives on a fraction of her income, but wonders: when is compromise self-indulgence and when is it essential? We honor such generosity and high ideals; but when we call people do-gooders there is skepticism in it, even hostility. Why do moral people make us uneasy? Between her stories, MacFarquhar threads a lively history of the literature, philosophy, social science, and self-help that have contributed to a deep suspicion of do-gooders in Western culture. Through its sympathetic and beautifully vivid storytelling, *Strangers Drowning* confronts us with fundamental questions about what it means to be human. In a world of strangers drowning in need, how much should we help, and how much can we help? Is it right to care for strangers even

at the expense of those we are closest to? Moving and provocative, *Strangers Drowning* challenges us to think about what we value most, and why.

[Designing Your New Work Life](#) Bill Burnett 2021-10-26 From the authors of the #1 New York Times bestseller *Designing Your Life* comes a revised, fully up-to-date edition of *Designing Your New Work Life*, a timely, urgently needed book that shows us how to transform our new uncharted work life into a meaningful dream job or company. With practical, useful tools, tips, and design ideas that show us how to navigate disruption (global, regional, or personal) and create new possibilities for our post-COVID work world and beyond. Bill Burnett and Dave Evans successfully taught graduate and undergraduate students at Stanford University and readers of their best-selling book, *Designing Your Life* ("The prototype for a happy life." —Brian Lehrer, NPR), that designers don't analyze, worry, think, complain their way forward; they build their way forward. And now more than ever, we all need creative and adaptable tools to cope with the chaos caused by COVID-19. In *Designing Your New Work Life*, Burnett and Evans show us how design thinking can transform our present job, and how it can improve our experience of work in times of disruption. All disruption is personal, write Burnett and Evans, as with the life-altering global pandemic we are living through now. *Designing Your New Work Life* makes clear that disruption is the new normal, that it is here to stay and that it is accelerating. And in the book's new chapters, Burnett and Evans show us step by step, how to design our way through disruption and how to stay ahead of it—and thrive. Burnett and Evans's *Disruption Design* offers us a radical new concept that makes use of the designer mindsets: Curiosity, Reframing, Radical collaboration, Awareness, Bias to action, Storytelling, to find our way through these uncharted times. In *Designing Your New Work Life*, Burnett and Evans show us, with tools, tips, and design ideas, how we can make new possibilities available even when our lives have been disrupted (be it globally, regionally, or personally), giving us the tools to enjoy the present moment and allowing us to begin to prototype our possible future.

[Designing Your Work Life](#) Bill Burnett 2020-02-25 When *Designing Your Life* was published in 2016, Stanford's Bill Burnett and Dave Evans taught readers how to use design thinking to build meaningful, fulfilling lives ("Life has questions. They have answers." —The New York Times). The book struck a chord, becoming an instant #1 New York Times bestseller. Now, in *DESIGNING YOUR WORK LIFE: How to Thrive and Change and Find Happiness at Work* they apply that transformative thinking to the place we spend more time than anywhere else: work. *DESIGNING YOUR WORK LIFE* teaches readers how to create the job they want—without necessarily leaving the job they already have. "Increasingly, it's up to workers to define their own happiness and success in this ever-moving landscape," they write, and chapter by chapter, they demonstrate how to build positive change, wherever you are in your career. Whether you want to stay in your job and make it a more meaningful experience, or if you decide it's time to move on, Evans and Burnett show you how to visualize and build a work-life that is productive, engaged, meaningful, and more fun.

The Precipice Toby Ord 2020-03-24 This urgent and eye-opening book makes the case that protecting humanity's future is the central challenge of our time. If all goes well, human history is just beginning. Our species could survive for billions of years - enough time to end disease, poverty, and injustice, and to flourish in ways unimaginable today. But this vast future is at risk. With the advent of nuclear weapons, humanity entered a new age, where we face existential catastrophes - those from which we could never come back. Since then, these dangers have only multiplied, from climate change to engineered pathogens and artificial intelligence. If we do not act fast to reach a place of safety, it will soon be too late. Drawing on over a decade of research, The Precipice explores the cutting-edge science behind the risks we face. It puts them in the context of the greater story of humanity: showing how ending these risks is among the most pressing moral

issues of our time. And it points the way forward, to the actions and strategies that can safeguard humanity. An Oxford philosopher committed to putting ideas into action, Toby Ord has advised the US National Intelligence Council, the UK Prime Minister's Office, and the World Bank on the biggest questions facing humanity. In *The Precipice*, he offers a startling reassessment of human history, the future we are failing to protect, and the steps we must take to ensure that our generation is not the last. "A book that seems made for the present moment." —New Yorker

Christians in an Age of Wealth Craig L. Blomberg 2013-11-26 In this book, Craig Blomberg addresses the tough questions about the place and purpose of wealth and material possessions in a Christian's life. He points to the goodness of wealth, as God originally designed it, but also surveys the Bible's many warnings against making an idol out of money. So are material possessions a blessing for which we should long? And what are the dangers that the use or abuse of material possessions can produce? Blomberg expounds upon how the sharing of goods and possessions is the key safeguard against both greed and covetousness. He expands on the concept of giving generously, even sacrificially, to those who are needier, demonstrating how Christians can participate in God's original good design for abundance and demonstrate the world-altering gospel of Christ. Is there any one key to keeping possessions in their proper, God-intended perspective? Are there limits on how rich we should become or on how poor we should allow others to get? What does a truly Christian economic system look like? How does the Bible's teaching on wealth fit into the gospel?

Surfing Uncertainty Andy Clark 2016 This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.

Bring Your Brain to Work Art Markman 2019-05-21 To succeed at work, first you need to understand your own brain If you're in a job interview, how should you think about the mindset of the interviewer? If you've just been promoted, how do you handle the tensions of managing former peers? And what are the telltale mental signs that it's time to start planning your next career move? We know that psychology can teach us much about behaviors and challenges relevant to work, such as making better decisions, influencing people, and dealing with stress. But many popular books on these topics analyze them as universal human phenomena without providing real-life, constructive career help. Bring Your Brain to Work changes all that. Professor, author, and popular radio host Art Markman focuses on three essential elements of a successful career-- getting a job, excelling at work, and finding your next position--and expertly illustrates how cognitive science, especially psychology, sheds fascinating and useful light on each of these elements. To succeed at a job interview, for example, you need to understand the mindset of the interviewer and know how to come across as exactly the individual the company wants to hire. To keep that job, it's critical to master the mental challenge of learning every day. Finally, careers require constant development, so you need to be able to sense when it's time to move up or out and to prepare yourself for the move. So many of the hurdles you face throughout your career are, first and foremost, psychological challenges, and Markman shows you how to use your different mental systems--motivational, social, and cognitive--to manage them more effectively. Integrating the latest research with engaging stories and examples from across the professional spectrum, Bring Your Brain to Work gets inside your head, helping you to succeed through a better understanding of yourself and those around you.
