The Crack in the Cosmic Egg Joseph Chilton Pearce 2002-08-01 The classic work that shaped the thought of a generation with its powerful insights into the true nature of mind and reality. • Defines culture as a "cosmic egg" structured by the mind's drive for logical ordering of its universe. • Provides techniques allowing individuals to break through the vicious circle of logic-based systems to attain expanded ways of creative living and learning. The sum total of our notions of what the world is--and what we perceive its full potential to be--form a shell of rational thought in which we reside. This logical universe creates a vicious circle of reasoning that robs our minds of power and prevents us from reaching our true potential. To step beyond that circle requires a centering and focus that today's society assaults on every level.

Through the insights of Teilhard, Tillich, Jung, Jesus, Carlos Castaneda, and others, Joseph Chilton Pearce provides a mode of thinking through which imagination can escape the mundane shell of current construct reality and leap into a new phase of human evolution. This enormously popular New Age classic is finally available again to challenge the assumptions of a new generation of readers and help them develop their potential through new creative modes of thinking. With a masterful synthesis of recent discoveries in physics, biology, and psychology, Pearce reveals the extraordinary relationship of mind and reality and nature's blueprint for a self-transcending humanity.

Radical Nature Christian de Quincey 2010-02-22 An exploration of consciousness in all matter--from quantum to cosmos •
Outlines theories of consciousness in ancient and modern philosophy from before Plato to Alfred North Whitehead •
Reveals the importance of understanding mind-in-matter for our relationships with the environment, with other people, even with ourselves Are rocks conscious? Do animals or plants have souls? Can trees feel pleasure or pain? Where in the great unfolding of life did consciousness first appear? How we answer such questions can dramatically affect the way we live our lives, how we treat the world of nature, and even how we relate to our own bodies. In this new edition of the award-winning Radical Nature, Christian de Quincey explores the "hard problem" of philosophy--how mind and matter are related--and proposes a radical and surprising answer: that matter itself tingles with consciousness at the deepest level. It's there in the cells of every living creature, even in molecules and atoms. Tracing the lineage of this idea through Western philosophy and science, he shows that it has a very noble history--from before Plato to Alfred North Whitehead. He reveals that the way to God is through nature and that understanding how body and soul fit together has surprising consequences for our relationships with our environment, with other people, and even with ourselves.

Dragon's Egg Robert L. Forward 2011-02-16 "In science fiction there is only a handful of books that stretch the mind—and this is one of them."—Arthur C. Clarke In a moving story of sacrifice and triumph, human scientists establish a relationship with intelligent lifeforms—the cheela—living on Dragon's Egg, a neutron star where one Earth hour is equivalent to hundreds of their years. The cheela culturally evolve from savagery to the discovery of science, and for a brief time, men are their diligent teachers. Praise for Dragon's Egg "Bob Forward writes in the tradition of Hal Clement's Mission of Gravity and carries it a giant step (how else?) forward."—Isaac Asimov "Dragon's Egg is superb. I couldn't have written it; it required too much real physics."—Larry Niven "This is one for the real science-fiction fan."—Frank Herbert "Robert L. Forward tells a good story and asks a profound question. If we run into a race of creatures who live a

hundred years while we live an hour, what can they say to us or we to them?”—Freeman J. Dyson “Forward has impeccable scientific credentials, and . . . big, original, speculative ideas.”—The Washington Post

Psychotherapy East & West Alan Watts 2017-01-13 Before he became a counterculture hero, Alan Watts was known as an incisive scholar of Eastern and Western psychology and philosophy. In this 1961 classic, Watts demonstrates his deep understanding of both Western psychotherapy and the Eastern spiritual philosophies of Buddhism, Taoism, Vedanta, and Yoga. He examined the problem of humans in a seemingly hostile universe in ways that questioned the social norms and illusions that bind and constrict modern humans. Marking a groundbreaking synthesis, Watts asserted that the powerful insights of Freud and Jung, which had, indeed, brought psychiatry close to the edge of liberation, could, if melded with the hitherto secret wisdom of the Eastern traditions, free people from their battles with the self. When psychotherapy merely helps us adjust to social norms, Watts argued, it falls short of true liberation, while Eastern philosophy seeks our natural relation to the cosmos.

The Information James Gleick 2011-03-01 From the bestselling author of the acclaimed Chaos and Genius comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa’s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins

of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. Perspectives on German Popular Music Michael Ahlers 2016-11-25 In this book, native popular musicologists focus on their own popular music cultures from Germany, Austria and Switzerland for the first time: from subcultural to mainstream phenomena; from the 1950s to contemporary acts. Starting with an introduction and two chapters on the histories of German popular music and its study, the volume then concentrates on focused, detailed and yet concise close readings from different perspectives (including particular historical East and West German perspectives), mostly focusing on the music and its protagonists. Moreover, these analyses deal with very original specific genres such as Schlager and Krautrock as well as transcultural genres such as Punk or Hip Hop. There are additional chapters on characteristically German developments within music media, journalism and the music industry. The book will contribute to a better understanding of German, Austrian and Swiss popular music, and will interconnect international and especially Anglo-American studies with German approaches. The book, as a consequence, will show close connections between global and local popular music cultures and diverse traditions of study.

The Radiant Child Thomas Armstrong 1985-01-01 Armstrong believes that children come into this life radiating and reflecting the mystery of creation; that their spiritual nature as well as their basic instincts are close to the surface of their awareness. This hidden side of youthful consciousness has been noticed and

appreciated primarily by poets, mystics, authors of fairy tales, and world mythologists -- but not by parents, teachers and child therapists. He relates mystical and transpersonal experiences in children and provides methods for keeping their inner dimension alive.

Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

Krautrock transnational Alexander Simmeth 2016-05-31 Als experimentelle bundesdeutsche Popmusik im Laufe der 1970er Jahre zu transnationalem Ruhm kam, begann eine neue Ära der Popmusik. Zum ersten Mal in der Geschichte des Pop kamen neueste Innovationen nicht mehr aus den Vereinigten Staaten oder dem Vereinigten Königreich, sondern aus der Bundesrepublik. Für einige Jahre galten Bands wie Kraftwerk, Can, Tangerine Dream, Amon Düül, Popol Vuh oder Faust - neben vielen anderen - als Pop-Avantgarde: in Europa, Nordamerika und weit darüber hinaus. Alexander Simmeth erforscht die Wurzeln des sogenannten Krautrock im Umfeld der jugendlichen Revolte am Ende der 1960er Jahre, die Rezeption zu Hause und in den beiden Ursprungsländern des Pop, und die Gründe für den andauernden Einfluss des Phänomens. Er identifiziert Krautrock als zentrales Moment kultureller Transnationalisierung in der Bundesrepublik, indem er grenzübergreifende Erfahrungen ebenso in den Blick nimmt wie den Austausch von Konzepten und Ideen.

Extinct Animals: An Encyclopedia of Species that Have Disappeared during Human History Ross Piper 2009-03-20

Everyone is familiar with the dodo and the woolly mammoth, but how many people have heard of the scimitar cat and the Falkland Island fox? *Extinct Animals* portrays over 60 remarkable animals that have been lost forever during the relatively recent geological past. Each entry provides a concise discussion of the history of the animal—how and where it lived, and how it became extinct—as well as the scientific discovery and analysis of the creature. In addition, this work examines what led to extinction—from the role of cyclical swings in the Earth's climate to the spread of humans and their activities. Many scientists believe that we are in the middle of a mass extinction right now, caused by the human undermining of the earth's complex systems that support life. Understanding what caused the extinction of animals in the past may help us understand and prevent the extinction of species in the future. *Extinct Animals* examines the biology and history of some of the most interesting creatures that have ever lived, including: The American Terror Bird, which probably became extinct over 1 million years ago, who were massive predators, some of which were almost 10 feet tall; the Rocky Mountain Locust, last seen in 1902, formed the most immense animal aggregations ever known, with swarms estimated to include over 10 trillion insects; the Giant Ground Sloth, which was as large as an elephant; and the Neandertals, the first Europeans, which co-existed with prehistoric *Homo sapiens*. *Extinct Animals* includes illustrations—many created for the work—that help the reader visualize the extinct creature, and each entry concludes with a list of resources for those who wish to do further research.

Everything Is Going to Kill Everybody Robert Brockway 2010-04-06 Just when you thought you'd accepted your own mortality . . .

Everything Is Going to Kill Everybody is bringing panic back.

Twenty illustrated, hilariously fear-inducing essays reveal the chilling and very real experiments, dangerous emerging technologies, and terrifying natural disasters that soon could—or very nearly already did—bring about the end of humanity. In short, everything in here will kill you and everyone you love. At any moment. And nobody's told you about it—until now: •

Experiments in green energy like the HiPER, which uses massive lasers to create a tiny “contained” sun; it's an idea that could save the world if it doesn't consume us all in a fiery fusion reaction first. • Global disasters like the hypercane—a hurricane so large it could cover all of North America and shoot trailer parks into space! • Terrifying new developments in robotics like the EATR, which powers itself on meat—an invention in the running for “Worst Decision Made by Anybody.”

Krautrock Nikolaos Kotsopoulos 2009 Krautrock: Cosmic Rock and its Legacy charts the history of this influential music genre, from its roots in free jazz, psychedelia and the music of Karlheinz Stockhausen, to the groundbreaking experiments of Faust, Kraftwerk and Can. The late 1960s in West Germany was a period of profound breakthroughs, upheavals and reversals. Out of this climate, a music scene exploded that would forever change the face of western rock; at times anarchic, at others mystical, magickal, or utopian, it pushed rock beyond any known limits. Illustrated with concert photos, posters, record cover art and other rare visual material, and also including essays by Michel Faber, Erik Davis, David Stubbs, Ken Hollings and testimonials from Gavin Russom (Delia and Gavin/Black Meteoric Star), Plastic Crimewave, Stephen Thrower (Coil/Cyclobe), and Ann Shenton (Add N to (X)) this is an essential compendium to a music whose spirit and ideas still vibrate through contemporary culture today.

Creation Myths of the World: Parts I-II David Adams Leeming 2010 Nearly every belief system in every part of the world has its own distinctive answers to how the world was created, often taking the form of a story or myth. These narratives offer insight into a culture's values, its world view, and its interpretations of the relationship between the individual, society, and the divine.

Exploring the Crack in the Cosmic Egg Joseph Chilton Pearce 2014-02-15 The classic follow-up to the bestselling The Crack in the Cosmic Egg • Explains the process of acculturation and the mechanisms that create our self-limiting "cosmic egg" of consensus reality • Reveals how our biological development innately creates a "crack" in our cosmic egg--leaving a way to return to the unencumbered consciousness of childhood • Explores ways to discover and explore the "crack" to restore

wholeness to our minds and reestablish our ability to create our own realities In this classic follow-up to his bestselling *The Crack in the Cosmic Egg*, Joseph Chilton Pearce explains the process of acculturation and the mechanisms that create our self-limiting “cosmic egg” of consensus reality. Laying the groundwork for his later classic *Magical Child*, Pearce shows that we go through early childhood connecting with the world through our senses. With the development of language and the process of acculturation not only do our direct experiences of the world become much less vivid but our innate states of nonordinary consciousness become suppressed. Trapped in a specific cultural context--a “cosmic egg”--we are no longer able to have or even recognize mystical experiences not mediated by the limitations of our culture. Motivated primarily by a fear of death, our enculturation literally splits our minds and prevents us from living fully in the present. Drawing from Carlos Castaneda’s writings about Don Juan and the sense of “body-knowing,” Pearce explores the varieties of nonordinary consciousness that can help us return to the unencumbered consciousness of our infancy. He shows that just as we each create our own cosmic egg of reality through cultural conditioning, we also innately create a “crack” in that egg. Ultimately certain shifts in our biological development take place to offset acculturation, leaving an avenue of return to our primary state. Pearce examines the creation of the “egg” itself and ways to discover its inherent cracks to restore wholeness to our minds, release us from our fear of death, and reestablish our ability to create our own realities through imagination and biological transcendence.

How the Mind Works Steven Pinker 2009-06-22 An assessment of human thought and behavior explores conundrums from the mind's ability to perceive three dimensions to the nature of consciousness, in an account that draws on beliefs in cognitive science and evolutionary biology.

The Theory Of Celestial Influence Rodney Collin 2019-01-15
Before Paulo Coelho and Eckhart Tolle came Rodney Collin. A huge 462 page book full of essential knowledge. How To Become Supernatural Man, The Universe and Cosmic Mystery is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in Search of the Miraculous.

Northern Archaeology and Cosmology Vesa-Pekka Herva 2019-06-28 In its analysis of the archaeologies and histories of the northern fringe of Europe, this book provides a focus on animistic–shamanistic cosmologies and the associated human–environment relations from the Neolithic to modern times. The North has fascinated Europeans throughout history, as an enchanted world of natural and supernatural marvels: a land of light and dark, of northern lights and the midnight sun, of witches and magic and of riches ranging from amber to oil. Northern lands conflate fantasies and realities. Rich archaeological, historical, ethnographic and folkloric materials combine in this book with cutting-edge theoretical perspectives drawn from relational ontologies and epistemologies, producing a fresh approach to the prehistory and history of a region that is pivotal to understanding Europe-wide processes, such as Neolithization and modernization. This book examines the mythical and actual northern worlds, with northern relational modes of perceiving and engaging with the world on the one hand and the 'place' of the North in European culture on the other. This book is an indispensable read for scholars of archaeology, anthropology, cultural studies and folklore in northern Europe, as well as researchers interested in how the North is intertwined with developments in the broader European and Eurasian world. It provides a deep-time understanding of globally topical issues and conflicting interests, as expressed by debates and controversies around Arctic resources, nature preservation and indigenous rights.

Arc of Justice Kevin Boyle 2007-04-01 An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to

compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their lives and homes. And so it began-a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. *Arc of Justice* is the winner of the 2004 National Book Award for Nonfiction.

American Trip Ido Hartogsohn 2020-07-14 How historical, social, and cultural forces shaped the psychedelic experience in midcentury America, from CIA experiments with LSD to Timothy Leary's Harvard Psilocybin Project. Are psychedelics invaluable therapeutic medicines, or dangerously unpredictable drugs that precipitate psychosis? Tools for spiritual communion or cognitive enhancers that spark innovation? Activators for one's private muse or part of a political movement? In the 1950s and 1960s, researchers studied psychedelics in all these incarnations, often arriving at contradictory results. In *American Trip*, Ido Hartogsohn examines how the psychedelic experience in midcentury America was shaped by historical, social, and cultural forces--by set (the mindset of the user) and setting (the environments in which the experience takes place).
