Compensation for Losses from the 9/11 Attacks Lloyd S. Dixon 2004 The terrorist attacks of September 11, 2001, caused tremendous loss of life, property, and income, and the resulting response from public and private organizations was unprecedented. This monograph examines the benefits received by those who were killed or seriously injured on 9/11 and the benefits provided to individuals and businesses in New York City that suffered losses from the attack on the World Trade Center. The authors examine the performance of the compensation system--insurance, tort, government programs, and charity--in responding to the losses stemming from 9/11.

Resilience in Aging Barbara Resnick 2010-10-14 The many significant technological and medical advances of the 21st century cannot overcome the escalating risk posed to older adults by such stressors as pain, weakness, fatigue, depression, anxiety, memory and other cognitive deficits, hearing loss, visual impairment, isolation,

marginalization, and physical and mental illness. In order to overcome these and other challenges, and to maintain as high a quality of life as possible, older adults and the professionals who treat them need to promote and develop the capacity for resilience, which is innate in all of us to some degree. The purpose of this book is to provide the current scientific theory, clinical guidelines, and real-world interventions with regard to resilience as a clinical tool. To that end, the book addresses such issues as concepts and operationalization of resilience; relevance of resilience to successful aging; impact of personality and genetics on resilience; relationship between resilience and motivation; relationship between resilience and survival; promoting resilience in long-term care; and the lifespan approach to resilience. By addressing ways in which the hypothetical and theoretical concepts of resilience can be applied in geriatric practice, Resilience in Aging provides inroads to the current knowledge and practice of resilience from the perspectives of physiology, psychology, culture, creativity, and economics. In addition, the book considers the impact of resilience on critical aspects of life for older adults such as policy issues (e.g., nursing home policies, Medicare guidelines), health and wellness, motivation, spirituality, and survival. Following these discussions, the book focuses on interventions that increase resilience. The intervention chapters include case studies and are intended to be useful at the clinical level. The book concludes with a discussion of future directions in optimizing resilience in the elderly and the importance of a lifespan approach to aging.

The Babysitter Nancy Bush 2020-06-30 The whispers may scare you . . . In River Glen, Oregon, rumors are spreading about the Babysitter Stalker. One victim was fatally stabbed. A second fell—or was pushed—from a rooftop deck. High school sophomore Jamie Whelan, scheduled to watch the Ryerson twins tonight, isn't worried. She's more interested in the party she'll go to later, as soon as her sister Emma arrives to take over babysitting duties. But nothing goes according to plan . . . But the truth . . . Twenty years after that night's vicious

attack, Emma remains scarred in body and mind. Jamie, back in River Glen after their mother's death, still feels guilty over trading places that fateful evening. Then suddenly another young babysitter is attacked. Jamie, with a teenage daughter of her own, fears something much more twisted than coincidence. Is even more terrifying . . . Is this new nightmare connected with those long-ago crimes? Emma's fractured memories may contain the answer. But the deeper Jamie digs, the darker the secrets waiting to be uncovered—and avenged . . .

Culture of Human Stem Cells R. Ian Freshney 2007-07-16 This book collects the most effective and cutting-edge methods and protocols for deriving and culturing human embryonic and adult stem cells—in one handy resource. This groundbreaking book follows the tradition of previous books in the Culture of Specialized Cells Series—each methods and protocols chapter is laid out exactly like the next, with stepwise protocols, preceded by specific requirements for that protocol, and a concise discussion of methods illustrated by data. The editors describe a limited number of representative techniques across a wide spectrum of stem cells from embryonic, newborn, and adult tissue, yielding an all-encompassing and versatile guide to the field of stem cell biology and culture. The book includes a comprehensive list of suppliers for all equipment used in the protocols presented, with websites available in an appendix. Additionally, there is a chapter on quality control, and other chapters covering legal and ethical issues, cryopreservation, and feeder layer culture. This text is a one-stop resource for all researchers, clinical scientists, teachers, and students involved in this crucial area of study.

AmGov Christine Barbour 2019-02-12 All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.

Molten Salts Handbook George J. Janz 2013-06-11 Molten Salts Handbook focuses on the features, properties, and structure of molten salts. This book presents several topics in annotated bibliographic table form, including phase equilibria, chemical syntheses, and molten salt electrolytes. Organized into six chapters, this book starts with a tabular presentation of data of the physical properties, thermodynamic properties, electrochemical properties, practical features, as well as spectroscopy and structure of molten salts. This text then illustrates the design features of different experimental assemblies and provides information on the technique through a liberally annotated bibliography. Other chapters provide a chemical index, which offers a ready guide to the status of data over the entire range of interests. This book presents as well the properties of viscosity, density, surface tension, refractive index, and electrical conductance for different compounds as single salt melts. This book is a valuable resource for scientists and researchers from diverse fields, including theoretical and applied electrochemistry, inorganic coordination chemistry, and transition metal chemistry.

Magnetic Techniques for the Treatment of Materials Jan Svoboda 2007-05-08 This book reflects changes that

have occurred during the last two decades in theoretical understanding and practical implementation of magnetic techniques in materials treatment. Research and development needs, based on the current strategic thinking and on principles of sustainable development are outlined. Development of magnetic separators based on powerful permanent magnetic materials, construction of reliable superconducting separators, design of efficient eddy-current separators and industrial implementation of magnetic carriers and magnetic fluids are examples of innovative changes that have taken place during the last twenty years. The book reflects the current technological trends and re-positions the research, development and practice of magnetic methods of material treatment in such areas as minerals beneficiation, recycling, waste treatment and biomedical and clinical applications.
