The Entrepreneurial Mind Jeffrey A. Timmons 1989 THE ENTREPRENEURIAL MIND, Jeffrey A. Timmons, Harvard Business School "A well-written & practical book designed to aid persons contemplating an entrepreneurial venture. Timmons, a specialist in entrepreneurship, has done an excellent job covering the field. Starting with a broad overview of what entrepreneurship is, he concludes with an assessment aimed at summing up the strengths & weaknesses of a new enterprise in advance. In between, he provides sound advice on necessary managerial skills; how to form, build, & reward a new venture team; planning & goal-setting; & the pros & cons of family businesses. Particular attention is also given to the need for ethical standards. Recommended." -- Library Journal. "A close look at the psychology of the entrepreneur & how that type of personality reacts with people & the world at large. Timmons does a good job of exploding myths & misconceptions, offering a wealth of insight into success, failure, & the hard work it takes to succeed in starting up a business or taking over the reins of an established or family-owned enterprise. The pitfalls of entrepreneurial life are analyzed, but more importantly, the positive attributes of the entrepreneur are emphasized. Numerous real-life case studies supplement the coverage." -- Booklist.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
