The Startup Owner's Manual Steve Blank 2020-03-17 More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: • Avoid the 9 deadly sins that destroy startups' chances for success • Use the Customer Development method to bring your business idea to life • Incorporate the Business Model Canvas as the organizing principle for startup hypotheses • Identify your customers and determine how to "get, keep and grow" customers profitably • Compute how you'll drive your startup to repeatable, scalable profits. The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

The Registrar's Manual for Detecting Forced Marriages Sophie Hardach 2011-04-01 Swimming for his life towards traffickers on the Italian shore, Selim enters a world where Kurdish refugees disguise themselves as tomatoes, dates of birth are a matter of opinion, and a residency permit is a ticket to paradise. When he ends up in a small town in Germany, Selim believes he is finally safe, until the law catches up with him and the clock starts ticking. Selim realises there is only one way to avoid deportation, if he dare try ... Fifteen years later, in a town hall in Paris, a Registrar receives an unsettling book in the post. The Registrar's Manual for Detecting Forced Marriages only fuels her suspicions surrounding an impending Kurdish wedding. Unsure how to intervene, she embarks on an investigation that brings her uncomfortably close to an old acquaintance: Selim. Written with real imaginative flair, heart and humour, The Registrar's Manual for Detecting Forced Marriages introduces an unlikely hero who'll prove impossible to forget, and a prodigious new talent in Sophie Hardach.

Internal Combustion Engines Institution of Mechanical Engineers 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal

transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derived fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Building a New Nation Dan Connell 2004 In April 1976, Dan Connell slipped into Eritrea's besieged capital, Asmara, where he witnessed the assassination of a top-ranking Ethiopian official and its bloody aftermath-the summary execution of dozens of innocent civilians. His front-page account in The Washington Post broke Ethiopia's long-standing information blockade. Connell went on to write about the radical social transformation underway in guerrilla-held areas, the near defeat of Ethiopia's American-backed army, the.
