Agricultural Marketing and Consumer Behavior in a Changing World Berend Wierenga 2012-12-06 As in many other sectors, in agribusiness major changes are taking place. On the demand side, consumers are changing lifestyles, eating and shopping habits, and

increasingly are demanding more accommodation of these needs in the supermarket. With regard to the supply: the traditional distribution channel dominators - manufacturers of branded consumer products - are trying hard to defend their positions against retailers, who gather and use information about the consumer to streamline their enterprises and strengthen their ties with the consumer. The agricultural producers, meanwhile, face increased regulations with regard to food additives, pesticides, and herbicides. Pressures rise as their business becomes more specialized and capital-intensive than that of their predecessors. Finally, the larger political climate is not so favorable to agriculture, which now has to compete in the global market without significant government support. This title describes and interprets changes in the domain of agriculture and food. The contributors develop the theme of taking an interdisciplinary approach to coping with these changes, using concepts and methods developed in general marketing, which are adapted so as to apply to the particular characteristics of the food and agriculture sector. This book is published to honor the distinguished career of Professor Mathew T.G. Meulenberg from Wageningen Agricultural University, on the occasion of his retirement in September 1996. As a scientist, teacher, and advisor to the agribusiness and the government, Professor Meulenberg has made an important contribution to the development of marketing, inside and outside the domain of agriculture.

Global Marketing Kate Gillespie 2015-07-03 This textbook introduces students to the important concepts of global marketing today, and their managerial implications. Designed to be shorter than many other textbooks, Global Marketing focuses on getting to the point faster. Increasingly, marketing activities must be integrated at a global level. Other key features include: Coverage of often overlooked topics, such as the competitive rise of China's state-owned enterprises; the importance of diasporas as target markets; and the emerging threat to legitimate marketers from transnational criminal organizations A chapter dedicated to understanding global and local competitors, setting the stage for ongoing discussion of both buyers and competitors in an increasingly competitive global marketplace Extensive real-life examples and cases from developed and emerging markets, including insights into the often-overlooked markets of Africa, Latin America, and the Middle East Written in a student-friendly style, previous editions have received praise from both students and instructors. Peck 2018-05-02 This pathbreaking volume expands on the construct of psychological ownership, placing it in the contexts of both individual consumer behavior and the wider decision-making of consumer populations. An individual's feeling of ownership toward a target represents the perception that something is "mine!", and is highly relevant to buying and relating to specific goods, economic and health decision-making and, especially salient given today's privacy concerns, psychological ownership of digital content and personal data. Experts analyze the social conditions and cognitive processes concerning shared consumer experiences and psychological ownership. Contributors also discuss possibilities for socially responsible forms of psychological ownership using examples from environmental causes, and the behavioral mechanisms involved when psychological ownership becomes problematic, as in cases of hoarding. Included among the topics: Evidence from young children suggesting that even legal ownership is fundamentally psychological. Ownership, the extended self, and the extended object. Psychological ownership in financial decisions. The intersection of ownership and design. Can consumers perceive collective psychological ownership of an organization? Whose experience is it, anyway? Psychological ownership and enjoyment of

shared experiences. Psychological ownership as a facilitator of sustainable behaviors including stewardship. Future research avenues in psychological ownership. Psychological Ownership and Consumer Behavior pinpoints research topics and real-world issues that will define the field in the coming years. Strong Brands, Strong Relationships Susan Fournier
2015-06-12 From the editor team of the ground-breaking Consumer-Brand Relationships: Theory and Practice comes this new volume. Strong Brands, Strong Relationships is a collection of innovative research and management insights that build upon the foundations of the first book, but takes the study of brand relationships outside of traditional realms by applying new theoretical frameworks and considering new contexts. The result is an expanded and better-informed account of people's relationships with brands and a demonstration of the important and timely implications of this evolving sub-discipline. A range of different brand relationship environments are explored in the collection, including: online digital spaces, consumer collectives, global brands, luxury brands, branding in terrorist organizations, and the brand relationships of men and transient consumers. This book attends to relationship endings as well as their beginnings, providing a full life-cycle perspective. While the first volume focused on positive relationship benefits,

this collection explores dysfunctional dynamics, adversarial and politically-charged relationships, and those that are harmful to well-being. Evocative constructs are leveraged, including secrets, betrayals, anthropomorphism, lying, infidelity, retaliation, and bereavement. The curated collection provides both a deeper theoretical understanding of brand relationship phenomena and ideas for practical application from experiments and execution in commercial practice. *Strong Brands, Strong Relationships* will be the perfect read for marketing faculty and graduate students interested in branding dynamics, as well as managers responsible for stewarding brands.

Customer Loyalty and Brand Management
María Jesús Yagüe Guillén 2019-09-23
Loyalty is one of the main assets of a brand. In today's markets, achieving and maintaining loyal customers has become an increasingly complex challenge for brands due to the widespread acceptance and adoption of diverse technologies by which customers communicate with brands. Customers use different channels (physical, web, apps, social media) to seek information about a brand, communicate with it, chat about the brand and purchase its products. Firms are thus continuously changing and adapting their processes to provide customers with agile communication channels and coherent, integrated brand experiences through the different channels in which customers are present. In this context, understanding how brand management can improve value co-creation and multichannel experience—among other issues—and contribute to improving a brand's portfolio of loyal customers

constitutes an area of special interest for academics and marketing professionals. This Special Issue explores new areas of customer loyalty and brand management, providing new insights into the field. Both concepts have evolved over the last decade to encompass such concepts and practices as brand image, experiences, multichannel context, multimedia platforms and value co-creation, as well as relational variables such as trust, engagement and identification (among others).

Paul Peter 1996 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these

they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

Self-congruity M. Joseph Sirgy 1986 Self-Congruity provides a comprehensive understanding of the self-concept, integrating the many references to it in the psychological literature. Using his previous findings, the author considers cognitive-versus-affective phenomena, and intrapersonal, interpersonal, situational, and analytic modes. He then applies his integrated theory to the problem of change in self-concept and behavior.
