Investment Decisions and the Logic of Valuation Carlo Alberto Magni 2020-02-11 This book presents a new approach to the valuation of capital asset investments and investment decision-making. Starting from simple premises and working logically through three basic elements (capital, income, and cash flow), it guides readers on an interdisciplinary journey through the subtleties of accounting and finance, explaining how to correctly measure a project's economic profitability and efficiency, how to assess the impact of investment policy and financing policy on shareholder value creation, and how to design reliable, transparent, and logically consistent financial models. The book adopts an innovative pedagogical approach, based on a newly developed accounting-and-finance-engineering system, to help readers gain a deeper understanding of the accounting and financial magnitudes, learn about new analytical tools, and develop the necessary skills to practically implement them. This diverse approach to capital budgeting allows a sophisticated economic analysis in both absolute terms (values) and relative terms (rates of return), and is applicable to a wide range of economic entities, including real assets and financial assets, engineering designs and manufacturing schemes, corporate-financed and project-financed transactions, privately-owned projects and public investments, individual projects and firms. As such, this book is a valuable resource for a broad audience, including scholars and researchers, industry practitioners, executives, and managers, as well as students of corporate finance, managerial finance, engineering economics, financial management, management accounting, operations research, and financial mathematics. It features more than 180 guided examples, 50 charts and figures and over 160 explanatory tables that help readers grasp the new concepts and tools. Each chapter starts with an abstract and a list of the skills readers can expect to gain, and concludes with a list of key points summarizing the content.

Strategic Financial Management - Analysed company: adidas AG Andreas Klein 2007-10-25 Seminar paper from the year 2007 in the subject Business economics - Miscellaneous, grade: A, University of Bradford (School of Management), course: Strategic Financial Management, 29 entries in the bibliography, language: English, abstract: The valuation of a company is fundamental for financial and strategic decision making. One of the first structured approaches to assess the value of a company was the so-called Shareholder Value Analysis developed by Rappaport (1986). He identified value drivers in three different areas, namely Finance, Investment and Business. The theory says that improvement of these value drivers leads directly to an increase in shareholder value (Spencer and Francis 1998). In this assignment, the company to be evaluated, namely adidas, will be presented and then analysed concerning the value delivery in recent years. After that, different methods of company valuation will be explained and applied to adidas. The assignment will finish with a critical appraisal of the findings.

Lightning Boys 2 is a must-have companion to the first collection and continues the theme of tales from pilots and other crew connected with this iconic aircraft, giving a rare insight into postwar fighter operations. In 20 separate stories to intrigue, amaze, and amuse, the book has also been compiled and written by Richard Pike. The reader is taken to situations as diverse as intercepting 60-plus enemy aircraft, a desperate struggle in a cockpit flooded by tropical downpours, the difficulties of being affected by sudden and painful toothache at high altitude, and the curious encounter with an unidentified flying object. Yet another chapter paints a dramatic reconstruction of a scene in Germany when a Lightning, having entered an inadvertent, out-of-control spin, began an earthwards plunge towards a town center.

What is the Bootstrap Effect? Merger & Acquisition-Activities and their Influence on Stock Prices Florian Beyer 2020-04-08 Seminar paper from the year 2017 in the subject Business economics - Investment and Finance, grade: 1,7, The FOM University of Applied Sciences, Hamburg, language: English, abstract: This paper will examine the question of how M&A activities influence a company's stock price and earnings per share (EPS), especially if the bootstrap effect occurs? In 2016, the global mergers and acquisitions (M&A) activities decreased by about 18 percent compared to 2015. Altogether, 17,369 deals with a value of 3.2 trillion (tn.) US-Dollars (USD) were performed. There are numerous reasons to invest and divest in inorganic growth. Organic growth has its limitations, thus acquiring competitors, growing vertically or horizontally as well as accessing new markets are strong motivators to do so. Growing a business is often linked with going public. The decision to be part of the stock market and to perform M&A influences an enterprise's value for various reasons. To approach these questions, the first chapter gives a general overview of reasons, motivators, risks and benefits of M&A. Thereafter, the influence of M&A on a company's shareholder value and EPS is examined. Then, the bootstrap effect is explained and subsequently illustrated by an exemplary M&A transaction. Afterwards the risks and benefits of bootstrapping and M&A are analysed to consider its usefulness and influence on the share price and EPS.

Construction Quality and the Economy Low Sui Pheng 2019-01-08 This book discusses the relationship between construction quality and the state of the Singapore national economy, and describes how construction quality is affected as contracting firms strategically manage issues relating to profitability and survivability during economic boom and bust cycles. Adopting a three-pronged approach to explain the key issues, the book first explains the effect of the state of the Singapore national economy (boom or bust) on the construction quality delivered by contracting firms. Secondly, it explains how contracting firms respond to the performance of the national economy through their dynamic bidding strategies, leading to significant quality trade-offs in some instances, especially when there is imprecise market information. Thirdly, it recommends various strategic measures that key stakeholders and government policy-makers can take to circumvent the quality trade-off in the construction industry when faced with dynamic fluctuations in the performance of the national economy. Although the book focuses on Singapore, it appeals to a global audience since countries worldwide (and their respective building-related stakeholders) face the same issues in terms of the time–cost–quality trade-off decision-making process involving the entire supply chain.

Elder Mistreatment National Research Council 2003-02-06 Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers "and sometimes the abused themselves" want to conceal. Elder Mistreatment in an Aging America takes a giant step toward broadening our understanding of the mistreatment of the elderly and recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual, methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a report's reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. Elder Mistreatment in an Aging America will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.

Fine Trading and Factoring. Methods of Company Funding Florian Beyer 2020-03 Seminar paper from the year 2017 in the subject Business economics - Investment and Finance, grade: 1,0, The FOM University of Applied Sciences, Hamburg, language: English, abstract: A brief introduction of the Basel requirements is outlined. Following a definition and distinguishment of fine trading, factoring and reverse. Advantages and disadvantages are being explained as well. Finally, the influences on the balance sheet of the involved parties and on working capital are investigated. Ten years ago, from 2007 to 2011 the global financial and the euro crisis have caused a peak in bankruptcies of many companies and even states have experienced financial difficulties. Since 2011, the total number of companies' bankruptcies declines. In 2016, there were 21,518 insolvencies of companies in Germany. In contrast to this, in 2010, at the peak of the crisis there were 32,687 insolvencies. Overall, most of the companies in Germany are small and medium-sized enterprises (SME). In 2014, they represented 99.3 percent of all companies in Germany. A proper working capital management is essential for all companies. Especially, SME are otherwise threatened to lack of liquidity or risk to become insolvent. Company funding has experienced profound changes lately. Basel I-III have extensively changed the regulatory circumstances for banks and their granting of credits. Banks must comply with changed regulatory capital and liquidity requirements as well as with new debt caps. This has a strong influence on company funding. Therefore, the rating of a firm and the risk of an investment will increase the price of the company funding. The changed importance of working capital management and the new regulatory requirements have altered companies' financing possibilities and partners. Moreover, the financial crisis has revealed their dependency on certain bankrollers. Thus, other methods of financing suchlike factoring, fine trading, leasing and crowdfunding increased their impor

Richard Jewell Marie Brenner 2019-12-10 Now a major film from Academy Award-winning director Clint Eastwood—starring Sam Rockwell, Kathy Bates, Jon Hamm, Olivia Wilde, and Paul Walter Hauser?! This collection of captivating profiles from Vanity Fair writer Marie Brenner spans her award-winning career and features larger-than-life figures such as Donald Trump, Roy Cohn, Malala Yousafzai, and Richard Jewell—the security guard whose dramatic heroism at the bombing of the 1996 Olympics made him the FBI's prime suspect. Previously published as *A Private War*, Marie Brenner's *Richard Jewell* tells a gripping true story of heroism and injustice. In the early morning hours of July 27, 1996, three pipe bombs exploded at the Summer Olympics in Atlanta, Georgia, killing one person and injuring 111 others. Hundreds more potential casualties were prevented by the vigilance and quick actions of security guard Richard Jewell, who uncovered the bombs and began evacuating the area. But no good deed goes unpunished. Desperate for a lead, investigators and journalists pursued Jewell as a potential suspect in the case, painting him as an obvious match for the infamous “lone bomber” profile. Accused of being a terrorist and a failed law enforcement officer who craved public recognition for his false heroics, he saw his reputation smeared across headlines and broadcasts nationwide. After a months-long investigation found no evidence against him, the US Attorney finally cleared Jewell's name. Yet Jewell would not be fully exonerated in the eyes of the public until the actual bomber confessed in 2005, just two years before Jewell's premature death at the age of forty-four. In *Richard Jewell*, veteran journalist Marie Brenner brilliantly chronicles Jewell's ordeal to share the story of an ordinary man whose life was shattered by a false narrative. This collection also includes Brenner's classic encounters with Donald Trump, Roy Cohn, Malala Yousafzai, Marie Colvin, and others.
