Hearing James Tysome 2015-12-16 Hearing is essential for normal communication. We are able to localise sound with surprising accuracy and can detect time differences as small as the time it takes for sound to pass from the mouth of one person to the ear of another. However, hearing loss is underdiagnosed, poorly understood and a common cause of social isolation.

The Hypothalamus-Pituitary-Adrenal Axis 2008-09-12 The hypothalamic-pituitary-adrenal axis controls reactions to stress and regulates various body processes such as digestion, the immune system, mood and sexuality, and energy usage. This volume focuses on the role it plays in the immune system and provides substantive experimental and clinical data to support current understanding in the field, and potential applications of this knowledge in the treatment of disease. * Evidence presented in this book suggests that the nervous, endocrine, and immune systems form the Neuroendocrine Immune Supersystem, which integrates all the biological functions of higher organisms both in health and disease for their entire life cycle. * Contributors include both the scientists who initiated the work on the HPA axis and on the autonomic nervous system, and those who joined the field later.

Ideology and Identity Pradeep K. Chhibber 2018-08-24 Indian party politics, commonly viewed as chaotic, clientelistic, and corrupt, is nevertheless a model for deepening democracy and accommodating diversity. Historically, though, observers have argued that Indian politics is non-ideological in nature. In contrast, Pradeep Chhibber and Rahul Verma contend that the Western European paradigm of "ideology" is not applicable to many contemporary multiethnic countries. In these more diverse states, the most important ideological debates center on statism-the extent to which the state should dominate and regulate society-and recognition-whether and how the state should accommodate various marginalized groups and protect minority rights from majorities. Using survey data from the Indian National Election Studies and evidence from the Constituent Assembly debates, they show how education, the media, and religious practice transmit the competing ideas that lie at the heart of ideological debates in India.

Out of Time Rahul Rao 2020-03-09 Between 2009 and 2014, an anti-homosexuality law circulating in the Ugandan parliament came to be the focus of a global conversation about queer rights. The law attracted attention for the draconian nature of its provisions and for the involvement of US evangelical Christian activists who were said to have lobbied for its passage. Focusing on the Ugandan case, this book seeks to understand the encounters and entanglements across geopolitical divides that produce and contest contemporary queerphobias. It investigates the impact and memory of the colonial encounter on the politics of sexuality, the politics of religiosity of different Christian denominations, and the political economy of contemporary homophobic moral panics. In addition, *Out of Time* places the Ugandan experience in conversation with contemporaneous developments in India and Britain--three locations that are yoked together by the experience of British imperialism and its afterlives. Intervening in a queer theoretical literature on temporality, Rahul Rao argues that time and space matter differently in the queer politics of postcolonial countries. By employing an intersectional analysis and drawing on a range of sources, Rao offers an original interpretation of why queerness mutates to become a metonym for categories such as nationality, religiosity, race, class, and caste. The book argues that these mutations reveal the deep grammars forged in the violence that founds and reproduces the social institutions in which queer difference struggles to make space for itself.

Third World Protest Rahul Rao 2010-07-08 If boundaries protect us from threats, how should we think about the boundaries of states in a world where threats to human rights emanate from both outside the state and the state itself? Arguing that attitudes towards boundaries are premised on assumptions about the locus of threats to vital interests, Rahul Rao digs beneath two major normative orientations towards boundaries-cosmopolitanism and nationalism-which structure thinking on questions of public policy and identity. Insofar as the Third World is concerned, hegemonic versions of both orientations are underpinned by simplistic imageries of threat. In the cosmopolitan gaze, political and economic crises in the Third World are attributed mainly to factors internal to the Third World state with the international playing the role of heroic saviour. In Third World nationalist imagery, the international is portrayed as a realm of neo-imperialist predation from which the domestic has to be secured. Both images capture widely held intuitions about the sources of threats to

human rights, but each by itself provides a resolutely partial inventory of these threats. By juxtaposing critical accounts of both discourses, Rao argues that protest sensibilities in the current conjuncture must be critical of hegemonic variants of both cosmopolitanism and nationalism. The second half of the book illustrates what such a critique might look like. Journeying through the writings of James Joyce, Rabindranath Tagore, Edward Said and Frantz Fanon, the activism of 'anti-globalisation' protesters, and the dilemmas of queer rights activists, Rao demonstrates that important currents of Third World protest have long battled against both the international and the domestic, in a manner that combines nationalist and cosmopolitan sensibilities.

Mayo Clinic Critical Care Case Review is a unique compellation of cases presented at the highly rated Mayo Clinic Clinical Pathological Case (CPC) Conference. Designed to cover rare cases in a short amount of time, these reviews are set up in what is called the "unknown" format: highlighting the clinically key elements of the patient's hospital course, singling out the diagnostic dilemmas, and concludes with a question and answer format that allows clinicians to take home relative points for clinical practice. Written by practicing intensivists and critical care fellows for practicing intensivists and critical care fellows, this book combines interesting reading experiences with critical care medicine review. Each chapter ends with questions and answers that provide a board style review for the readers. Each case begins on the left-hand page with the discussion on the right, written succinctly to provide quick diagnostic understanding. While most critical care review books focus solely on an organ-system format, Mayo Clinic Critical Care Case Review captures the spirit of the CPC Conference in its text and illustrations.

10 Principles To Love Yourself: How to Start your Day and Sleep Peacefully
Deepak Gupta 2019-01-06 'At least love yourself before loving others' I know the title is much known to readers, but we disregard the lessons we know much in our lives. When we are born and commence our life, we encounter diverse people with different attributes to achieve our purpose in life. Some teach us lessons while some remains with us, but this is not the way we should live our lives. We think we are candid and the finest curtain in front of the window, but life doesn't work like that. Most of the people waste half of their lives chasing hoax dreams, pretending to be theirs. If you don't know who you are then, you will never be able to know what you will become. 'We occupy many unconscious thoughts in our mind. When we think 100% we should write merely 1% which should be best, precise and useful.'

Philosophical Foundations of the Law of Torts John Oberdiek 2014-02 This book offers a rich insight into the law of torts and cognate fields, and will be of broad interest to those working in legal and moral philosophy. It has contributions from all over the world and represents the state-of-the art in tort theory.

The Nature of Moral Responsibility Randolph Clarke 2015 Recent philosophical work reveals considerable disagreement about what it is to be morally responsible for something. Indeed, some theorists claim to distinguish several varieties of moral responsibility, with different conditions that must be satisfied if one is to bear responsibility of one or another of these kinds. This volume presents twelve original essays from participants in these debates. The contributors include prominent established figures as well as influential younger philosophers.

India and Civilizational Futures Vinay Lal 2019-07-10 This second volume based on the deliberations of the Backwaters Collective puts into serious question the most familiar categories that have informed humanistic inquiry and social science research until now. The contributors probe how the intellectual and cultural resources of Indic civilization might be deployed to introduce greater plurality into the world of modern knowledge systems and reinstate metaphysics into the discourses of politics, with the hope that similar inquiries will in future be extended across the Global South. The chapters offer newer perspectives on India's past and intellectual traditions and suggest how we might liberate ourselves from the straightjackets of history, development, normal politics, the nation-state, and what globally passes for 'common sense' in various spheres of life and thought. While some contributors engage with a few figures who have been critical in shaping India's intellectual life, such as Kabir, Narayana Guru, Ambedkar, Tagore, and Gandhi, others bring into the limelight equally compelling if somewhat neglected figures such as Rahul Sankrityayan, Ranade, and T.R.V. Murti. Conceptual papers on intercommunalism, South Asian ideas of hospitality, and mnemocultural modes of learning complete the volume.
