Omensetter's Luck William H. Gass 1997-04-01 "The most important work of fiction by an American in this literary generation." -The New Republic Now celebrating the 50th anniversary of its publication, Omensetter's Luck is the masterful first novel by the author of The Tunnel, Middle C, On Being Blue, and Eyes: Novellas and Stories. Greeted as a masterpiece when it was first published in 1966, Omensetter's Luck is the quirky, impressionistic, and breathtakingly original story of an ordinary community galvanized by the presence of an extraordinary man. Set in a small Ohio town in the 1890s, it chronicles - through the voices of various participants and observers - the confrontation between Brackett Omensetter, a man of preternatural goodness, and the Reverend Jethro Furber, a preacher crazed with a propensity for violent thoughts. Omensetter's Luck meticulously brings to life a specific time and place as it illuminates timeless questions about life, love, good, and evil. This edition includes an afterword written by William Gass in 1997. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Learning Geography Beyond the Traditional Classroom Chew-Hung Chang 2018-05-08 This book provides a collection of critical pieces that support the idea that good teaching and learning of geography in fieldwork and using technology should consider the dimensions of curriculum design, instructional design and resource provision, as well as assessment for such learning activities. Further, it clearly describes the thinking, experiences and critical comments concerning two broad areas of learning outside the traditional classroom – in the field and with technology.

Teaching and Learning in Digital World Mercè Gisbert 2015-06-11 Many reports over the last few years have analysed the potential use of games, videogames, 3D environments and virtual reality for educational purposes. Numerous emerging technological devices have also appeared that will play important roles in the development of teaching and learning processes. In the context of these developments, learning rather than teaching becomes the main axis in the organisation of the educational process. This process has now gone beyond the analogue world and face-toface education to enter the digital world, where new learning environments are being produced with ever greater doses of realism. Teaching and Learning in Digital Worlds examines the teaching and learning process in 3D virtual environments from both the theoretical and practical points of view.

The Bad Box Harvey Click 2013-10-10 Sarah Temple hopes to find a bit of peace and quiet when she leaves her abusive boyfriend, but instead she finds a world of horror. It's bad enough that a sadistic serial killer and another maniac are both trying to murder her, but what's worse is the mysterious Solitary One who controls both of them, a malevolent entity that the serial killer describes as a living darkness, a man and yet not a man, something that's alive and yet not alive, something that wants to appall the world. Trying to flee from the two killers, Sarah finds herself running deeper and deeper into a deadly supernatural trap, a place where people are buried alive, where ghastly apparitions mutter in the dark, where demented killers prowl, where a crumbling haunted house can drive its victims mad with terror, and where something buried for a very long time may walk again.

The Only Woman in the Room Eileen Pollack 2016-09-06 ONE OF WASHINGTON POST'S NOTABLE NONFICTION BOOKS OF THE YEAR "Beautifully written and full of important insights," this is a bracingly honest exploration of why there are still so few women in the hard sciences, mathematics, engineering, and computer science (Washington Post) In 2005, when Lawrence Summers, then president of Harvard, asked why so few women, even today, achieve tenured positions in the hard sciences, Eileen Pollack set out to find the answer. A successful fiction writer, Pollack had grown up in the 1960s and '70s dreaming of a career as a theoretical astrophysicist. Denied the chance to take advanced courses in science and math, she nonetheless made her way to Yale. There, despite finding herself far behind the men in her classes, she went on to graduate summa cum laude, with honors, as one of the university's first two women to earn a bachelor of science degree in physics. And yet, isolated, lacking in confidence, starved for encouragement, she abandoned her ambition to become a physicist. Years later, spurred by the suggestion that innate differences in scientific and mathematical aptitude might account for the dearth of tenured female faculty at Summer's institution, Pollack thought back on her own experiences and wondered what, if anything, had changed in the intervening decades. Based on six years interviewing her former teachers and classmates, as well as dozens of other women who had dropped out before completing their degrees in science or found their careers less rewarding than they had hoped, The Only Woman in the Room is a bracingly honest, no-holds-barred examination of the social, interpersonal, and institutional barriers confronting women—and minorities—in the STEM fields. This frankly personal and informed book reflects on women's experiences in a way that simple data can't, documenting not only the more blatant bias of another era but all the subtle disincentives women in the sciences still face. The Only Woman in the Room shows us the struggles women in the sciences have been hesitant to admit, and provides hope for changing attitudes and behaviors in ways that could bring far more women into fields in which even today they remain seriously underrepresented.

The Autobiography of an Ex-Colored Man James Weldon Johnson 2021-01-26 A gifted musician's decision to navigate society as a white man causes an internal debate about anti-blackness and the explicit nature of intent versus impact. James Weldon Johnson presents a distinct conflict driven by a person's desires and overwhelming fear. The Autobiography of an Ex-Colored Man follows the story of an unnamed narrator and his unique experience as a fair-skinned Black person. As a child, he is initially unaware of his race, but his mother soon clarifies their family's ancestry. The young man's ability to pass for white allows him to negate the harsh and discriminatory treatment most Black people face. This leads to a series of events that significantly shape the way he views his place in society. James Weldon Johnson delivers a captivating tale of identity politics in the U.S. and abroad. The main character is living a life of omission that provides public gain at a personal cost. This story maintains its relevance as a critical examination of race in society. With an eye-catching new cover, and professionally typeset manuscript, this edition of The Autobiography of an Ex-Colored Man is both modern and readable.

International Encyclopedia of Information and Library Science John Feather 2003-09-02 The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150

contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

Design for Belonging Susie Wise 2022-04-19 A practical, illustrated guide to using the tools of design to create feelings of inclusion, collaboration, and respect in groups of any type or size—a classroom, a work team, an international organization—from Stanford University's d.school. "This is a beautiful book. Wise has applied the gift and imagination and lenses of the d.school to one of our most precious questions: how to create belonging."—Priya Parker, author of the Art of Gathering and host of the New York Times

podcast Together Apart Belonging brings out the best in everyone. Whether you're a parent, teacher, community organizer, or leader of any sort, your group is unlikely to thrive if the individuals don't feel welcomed, included, and valued for who they are. The good news is that you can use design to create feelings of inclusion in your organization: rituals that bring people together, spaces that promote calm, roles that create a sense of responsibility, systems that make people feel respected, and more. You can't force feelings, but in Design for Belonging, author and educator Susie Wise explains how to use simple levers of design to set the stage for belonging to emerge. For example, add moveable furniture to a meeting space to customize for your group size; switch up the role of group leader regularly to increase visibility for everyone; or create a special ritual for people joining or leaving your organization to welcome fresh per-spectives and honor work well done. Inspiration and stories from leaders and scholars are paired with frameworks, tools, and tips, providing an opportunity to try on different approaches. By the end of the book, you'll be able to spot where a greater sense of belonging is needed and actively shape your world to cultivate it—whether it's a party, a high-stakes meeting, or a new national organization.

Transformation of Learning in Education and Training Pekka Kamarainen 2002 This book examines the different approaches to key qualifications in Europe and looks at new policies and related developments to promote innovative vocational educational and training provision, such as the use of information and communication technologies (ICT), the assessment of non-formal learning and the role of regional approaches to the subject. It discusses attempts to facilitate the renewal of work-related learning and considers the main issues involved in developing collaborative European projects based on cross-cultural exchanges and knowledge transfer.

E-Learning Bryn Holmes 2006-06 e-Learning is now an essential component of education. Globalization, the proliferation of information available on the Internet and the importance of knowledge-based economies have added a whole new dimension to teaching and learning. As more tutors, students and trainees, and institutions adopt online learning there is a need for resources that will examine and inform this field. Using examples from around the world, the authors of e-Learning: Concepts and Practices provide an in-depth examination of past, present and future e-learning approaches, and explore the implications of applying e-learning in practice. Topics include: educational evolution enriching the learning experience learner empowerment design concepts and considerations creation of e-communities communal constructivism. This book is essential reading for anyone involved in technology enhanced learning systems, whether an expert or coming new to the area. It will be of particular relevance to those involved in teaching or studying for information technology in education degrees, in training through e-learning courses and with developing e-learning resources.

Open Educational Resources Unesco 2009 Education systems today face two major challenges: expanding the reach of education and improving its quality. Traditional solutions will not suffice, especially in the context of today's knowledge-intensive societies. The Open Educational Resources movement offers one solution for extending the reach of education and expanding learning opportunities. The goal of the movement is to equalise access to knowledge worldwide through openly and freely available online high-quality content. UNESCO has contributed to building global awareness about Open Educational Resources, through facilitating an extended conversation in cyberspace. Over the course of two years, a large and diverse international community came together in a series of online discussion forums to discuss the concept of Open Educational Resources and its potential. In making the background papers and reports from those discussions available for the first time in print, this publication seeks to share even more widely the contributions made by so many. It is intended for all who may be

intrigued by the Open Educational Resources movement - its promise and its progress.

Cases on Challenges Facing E-Learning and National Development Ugur Demiray 2010 E-Learning offers many opportunities for individuals and institutions all over the world. Individuals can access to education they need almost anytime and anywhere they are ready to. Institutions are able to provide more cost-effective training to their employees. E-learning context is very important. It is common to find educators who perceive e-learning as internet-only education that encourages a static and content-focused series of text pages on screen. Others envisage the shallow and random online messages that are typical of a social real-time chat session, and wonder how that type of communication could add any value to academic discourse. Some may have experienced e-learning done poorly, and extrapolate their experience into a negative impression of all e-learning. The book will examine the emergence and growth of e-learning. The use of the "e" prefix indicates the application of information and communication technology (ICT) in government, finance, and all forms of socio-economic and community development. This eBook is designed and presented in two volumes. The first volume consists of the country cases of Algeria, Belarus, Bulgaria, Egypt, Estonia, Finland, Greece, Jordan, Hungary, Iraq, Iran, Israel, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, and Morocco. The second volume gives a place to the country cases of Norway, Oman, Palestine, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovakia, Slovenia, Sweden, Syria, Tajikistan, Tunisia, Turkey, Ukraine, United Arab Emirates and Uzbekistan. So, the book consists of more than 70 authors from 39 different countries and from 42 universities and 14 institutions with company for all 42 chapters. (Individual chapters contain references.) ["Cases on Challenges Facing E-Learning and National Development: Institutional Studies and Practices. Volume II" was co-edited by Leena Vainio, Mehmet Can Sahin, Gulsun Kurubacak, Petri T. Lounaskorpi, S. Raja Rao, and Carlos Machado. For Volume I, see ED508217.].

Adult Learning in the Digital Age Neil Selwyn 2006-03-22 This engaging book sheds light on the ways in which adults in the twenty-first century interact with technology in different learning environments. Based on one of the first large-scale academic research projects in this area, the authors present their findings and offer practical recommendations for the use of new technology in a learning society. They invite debate on: why ICTs are believed to be capable of affecting positive change in adult learning the drawbacks and limits of ICT in adult education what makes a lifelong learner the wider social, economic, cultural and political realities of the information age and the learning society. Adult Learning addresses key questions and provides a sound empirical foundation to the existing debate, highlighting the complex realities of the learning society and e-learning rhetoric. It tells the story of those who are excluded from the learning society, and offers a set of strong recommendations for practitioners, policy-makers, and politicians, as well as researchers and students.

Visions and Concepts for Education 4.0 Michael E. Auer 2021-02-05 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies.

Currently, the ICBL conferences are forums to exchange recent trends, research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

Pass ECDL 5 F. R. Heathcote 2009 Pass ECDL5 Using Microsoft Office 2007, covers the full ECDL syllabus providing everything learners need in an accessible, user-friendly format. This title includes step-by-step instructions and screenshots that guide students through the learning points enabling them to develop all the skills they need to pass the test. Learning objectives of each module are outlined clearly in an introduction, and throughout the book Ask yourself' sections help students to check that they have met all the criteria. Mock tests offer practice and help to build students' confidence, and are also linked to the syllabus references making it easy for teachers to identify any weaker areas amongst their learners. A downloadable grid shows how the book matches the syllabus giving peace of mind that students are covering what they need to.

A broad variety of topics related to teaching informatics in schools is addressed ranging from national experience reports to paedagogical and methodological issues. The papers are organized in topical sections on informatics education - the spectrum of options, national perspectives, outreach programmes, teacher education, informatics in primary schools, advanced concepts of informatics in schools, as well as competitions and exams.

Diagnosing Foreign Language Proficiency J. Charles Alderson 2005-08-22 This book addresses the need for tests that can diagnose the strengths and weaknesses in learners' developing foreign language proficiency. It presents the rationale for, and research surrounding, the development of DIALANG, a suite of internet-delivered diagnostic foreign language tests funded by the European Commission. The word 'diagnosis' is common in discussions in language education and applied linguistics, but very few truly diagnostic tests exist. However, the diagnosis of foreign language proficiency is central to helping learners make progress. This volume explores the nature of diagnostic testing, emphasizing the need for a better understanding of the nature of appropriate diagnosis. The book starts with a debate about how diagnostic testing might most appropriately be developed. Charles Alderson argues that the field has neglected to construct diagnostic tests, partly because other forms of testing have dominated the field. Alderson examines how proficiency has been diagnosed in the key areas of language: reading, listening, writing, grammar and vocabulary. The value of self-assessment is discussed and exemplified as a key component in developing learners', and teachers', awareness of the complexity of language learning. The book ends with a consideration of and recommendations for future developments in the diagnosis of foreign language proficiency.
