Sports Law Patrick K. Thornton 2010-02-04 Sports Law looks at major court cases, statutes, and regulations that explore a variety of legal issues in the sports industry. The early chapters provide an overview of sports law in general terms and explore its impact on race, politics, religion, and everyday affairs. Later chapters address hot button issues such as gender equity, drug testing, and discrimination. Written from a sport management perspective, rather than from a lawyer's, this text covers all the major areas presented in sports law today including: cases relating to torts, contracts, intellectual property, and agents. Factual scenarios throughout the text allow students to critically examine and apply sport management principles to legal issues facing the sports executive. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Seeking Safety Lisa M. Najavits 2021-05-07 This manual presents the first empirically studied, integrative treatment approach developed specifically for co-occurring PTSD and substance abuse. For persons with this prevalent and difficult-to-treat dual diagnosis, the most urgent clinical need is to establish safety--to work toward discontinuing substance use, letting go of dangerous relationships, and gaining control over such extreme symptoms as dissociation and self-harm. The manual is divided into 25 specific units or topics, addressing a range of different cognitive, behavioral, and interpersonal domains. Each topic provides highly practical tools and techniques to engage patients in treatment; teach "safe coping skills" that apply to both disorders; and restore ideals that have been lost, including respect, care, protection, and healing. Structured yet flexible, topics can be conducted in any order and in a range of different formats and settings. The volume is designed for maximum ease of use with a large-size format and helpful reproducible therapist sheets and handouts, which purchasers can also download and print at the companion Web page. See also the author's self-help guide Finding Your Best Self, Revised Edition: Recovery from Addiction, Trauma, or Both, an ideal client recommendation.

The Making of a Therapist Louis Cozolino 2004-07-17 Lessons from the personal experience and reflections of a therapist. The difficulty and cost of training psychotherapists properly is well known. It is far easier to provide a series of classes while ignoring the more challenging personal components of training. Despite the fact that the therapist's self-insight, emotional maturity, and calm centeredness are critical for successful psychotherapy, rote knowledge and technical skills are the focus of most training programs. As a result, the therapist's personal growth is either marginalized or ignored. The Making of a Therapist counters this trend by offering graduate students and beginning therapists a personal account of this important inner journey. Cozolino provides a unique look inside the mind and heart of an experienced therapist. Readers will find an exciting and privileged window into the experience of the therapist who, like themselves, is just starting out. In addition, The Making of a Therapist contains the practical advice, common-sense wisdom, and self-disclosure that practicing professionals have found to be the most helpful during their own training. The first part of the book, 'Getting Through Your First Sessions,' takes readers through the often-perilous days and weeks of conducting initial sessions with real clients. Cozolino addresses such basic concerns as: Do I need to be completely healthy myself before I can help others? What do I do if someone comes to me with an issue or problem I can't handle? What should I do if I have trouble listening to my clients? What if a client scares me? The second section of the book, 'Getting to Know Your Clients,' delves into the routine of therapy and the subsequent stages in which you continue to work with clients and help them. In this context, Cozolino presents the notion of the 'good enough' therapist, one who can surrender to his or her own imperfections while still guiding the therapeutic relationship to a positive outcome. The final section, 'Getting to Know Yourself,' goes to the core of the therapist's relation to him- or herself, addressing such issues as: How to turn your weaknesses into strengths, and how to deal with the complicated issues of pathological caretaking, countertransference, and self-care. Both an excellent introduction to the field as well as a valuable refresher for the experienced clinician, The Making of a Therapist offers readers the tools and insight that make the journey of becoming a therapist a rich and rewarding experience.

Indigenous and Local Communities and Protected Areas Grazia Borrini 2004 Conventional approaches to managing protected areas have often seen people and nature as separate entities. They preclude human communities from using natural resources and assume that their concerns are incompatible with conservation. This volume explores protected area approaches and models that see conservation as compatible with human communities. The main themes are co-managed protected areas and community conserved areas. Practical guidance is offered, drawing on recent experience, reflections and advice developed at the local, national, regional and international level.

Love Me, Don't Leave Me Michelle Skeen 2014-09-01 Everyone thrives on love, comfort, and the safety of family, friends, and community. But if you are denied these basic comforts early in life, whether through a lack of physical affection or emotional bonding, you may develop intense fears of abandonment that can last well into adulthood—fears so powerful that they can actually cause you to push people away. If you suffer from fears of abandonment, you may have underlying feelings of anger, shame, fear, anxiety, depression, and grief. These emotions are intense and painful, and when they surface they can lead to a number of negative behaviors, such as jealousy, clinging, and emotional blackmail. In Love Me, Don't Leave Me, therapist Michelle Skeen combines acceptance and commitment therapy (ACT), schema therapy, and dialectical behavioral therapy (DBT) to help you identify the root of your fears. In this book you'll learn how schema coping behaviors—deeply entrenched and automatic behaviors rooted in childhood experiences and fears—can take over and cause you to inadvertently sabotage your relationships. By recognizing these coping behaviors and understanding their cause, you will not only gain powerful insights into your own mind, but also into the minds of those around you. If you are ready to break the self-fulfilling cycle of mistrust, clinginess, and heartbreak and start building lasting, trusting relationships, this book will be your guide.
