Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

Moreover, for the proper structure, the practice of design thinking is the perfect answer. Design thinking is not a newly emerged concept and remains rooted in society for a very long time. The concept of design thinking is useful for designing and understanding context relating to any businesses. Design thinking may seem vague and a capable subject for all; however, the same is not true and requires thorough planning. If general reports are to be taken, design thinking has five stages, and each stage has its importance. Design thinking brings out the creativity of a person, and the scope of the same has widened in the modern day, where one encounters various problems even in day-to-day activities. Design thinking is a way to attain success and is an essential factor of development and growth.
