The Boy Who Harnessed the Wind William Kamkwamba 2009-09-29 William Kamkwamba was born in Malawi, a country where magic ruled and modern science was mystery. It was also a land withered by drought and hunger, and a place where hope and opportunity were hard to find. But William had read about windmills in a book called Using Energy, and he dreamed of building one that would bring electricity and water to his village and change his life and the lives of those around him. His neighbors may have mocked him and called him misala—crazy—but William was determined to show them what a little grit and ingenuity could do. Enchanted by the workings of electricity as a boy, William had a goal to study science in Malawi's top boarding schools. But in 2002, his country was stricken with a famine that left his family's farm devastated and his parents destitute. Unable to pay the eighty-dollar-a-year tuition for his education, William was forced to drop out and help his family forage for food as thousands across the country starved and died. Yet William refused to let go of his dreams. With nothing more than a fistful of cornmeal in his stomach, a small pile of once-forgotten science textbooks, and an armory of curiosity and determination, he embarked on a daring plan to bring his family a set of luxuries that only two percent of Malawians could afford and what the West considers a necessity—electricity and running water. Using scrap metal, tractor parts, and bicycle halves, William forged a crude yet operable windmill, an unlikely contraption and small miracle that eventually powered four lights, complete with homemade switches and a circuit breaker made from nails and wire. A second machine turned a water pump that could battle the drought and famine that loomed with every season. Soon, news of William's magetsi a mphepo—his "electric wind"—spread beyond the borders of his home, and the boy who was once called crazy became an inspiration to those around the world. Here is the remarkable story about human inventiveness and its power to overcome crippling adversity. The Boy Who Harnessed the Wind will inspire anyone who doubts the power of one individual's ability to change his community and better the lives of those around him.

Almost Astronauts Tanya Lee Stone 2011-09-27 They had the right stuff. They defied the prejudices of the time. And they blazed a trail for generations of women to follow. What does it take to be an astronaut? Excellence at flying, courage, intelligence, resistance to stress, top physical shape -- any checklist would include these. But when America created NASA in 1958, there was another unspoken rule: you had to be a man. Here is the tale of thirteen women who proved that they were not only as tough as the toughest man but also brave enough to challenge the government. They were blocked by prejudice, jealousy, and the scrawled note of one of the most powerful men in Washington. But even though the Mercury 13 women did not make it into space, they did not lose, for their example empowered young women to take their place in the sky, piloting jets and commanding space capsules. ALMOST ASTRONAUTS is the story of thirteen true pioneers of the space age. Back matter includes an author's note, an appendix, further reading, a bibliography, sources, source notes, and an index.

A Boy Is Not a Bird Edeet Ravel 2019-09-01 A young boy named Natt finds his world overturned when his family is uprooted and exiled to Siberia during the occupation of the Soviet Ukraine by Nazi Germany. In 1941, life in Natt's small town of Zastavna is comfortable and familiar, even if the grownups are acting strange, and his parents treat him like a baby. Natt knows there's a war on, of course, but he's glad their family didn't emigrate to Canada when they had a chance. His mother didn't want to leave their home, and neither did he. He especially wouldn't want to leave his best friend, Max. Max is the ideas guy, and he hears what's going on in the world from his older sisters. Together the boys are two brave musketeers. Then one day Natt goes home and finds his family huddled around the radio. The Russians are taking over. The churches and synagogues will close, Hebrew school will be held in secret, and there are tanks and soldiers in the street. But it's exciting, too. Natt wants to become a Young Pioneer, to show outstanding revolutionary spirit and make their new leader, Comrade Stalin, proud. But life under the Russians is hard. The soldiers are poor. They eat up all the food and they even take over Natt's house. Then Natt's father is arrested, and even Natt is detained and questioned. He feels like a nomad, sleeping at other people's houses while his mother works to free his father. As the adults try to protect him from the reality of their situation, and local authorities begin to round up deportees bound for Siberia, Natt is filled with a sense of guilt and grief. Why wasn't he brave enough to look up at the prison window when his mother took him to see his father for what might be the last time? Or can just getting through war be a heroic act in itself?
