Higher Education: Handbook of Theory and Research Michael B. Paulsen 2015-01-12 Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on such diverse topics as research on college students and faculty, organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology and more. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

San Francisco and the Long 60s Sarah Hill 2016-01-14 San Francisco and the Long 60s tells the fascinating story of the legacy of popular music in San Francisco between the years 1965-69. It is also a chronicle of the impact this brief cultural flowering has continued to have in the city – and more widely in American culture – right up to the present day. The aim of San Francisco and the Long 60s is to question the standard historical narrative of the time, situating the local popular music of the 1960s in the city's contemporary artistic and literary cultures: at once visionary and hallucinatory, experimental and traditional, singular and universal. These qualities defined the aesthetic experience of the local culture in the 1960s, and continue to inform the cultural and social life of the Bay Area even fifty years later. The brief period 1965-69 marks the emergence of the psychedelic counterculture in the Haight-Ashbury neighbourhood, the development of a local musical 'sound' into a mainstream international 'style', the mythologizing of the Haight-Ashbury as the destination for 'seekers' in the Summer of Love, and the ultimate dispersal of the original hippie community to outlying counties in the greater Bay Area and beyond. San Francisco and the Long 60s charts this period with the references to received historical accounts of the time, the musical, visual and literary communications from the counterculture, and retrospective glances from members of the 1960s Haight community via extensive first-hand interviews. Pretenders Lynda Williams 2008 Invited back from exile to claim the throne of Sevildom, Ev'rel fears no greater threat than the need to embellish the role of a frail princess with the Demish while she tries to decide how she feels about her ex-mentor, Di Mon. Does she love him or hate him? Di Mon is confident he wants Ev'rel to rule, but he's disillusioned in her as a leader and terrified she will discover the secret bond between him and the young Reetion, Ranar. Ev'rel's beautiful but battered son Amel just wants to enjoy his new friendship with Ayrium, but he must play out Ev'rel's father's determination to put him on the throne. Ayrium meets a peculiar, reclusive scholar from Monitum and worries romance will distract her from her true agenda. Will her inconvenient love interest change everything for everyone?

Start-up Hervé Le Bret 2007 Although start-ups represent a major phenomenon in the USA, they also create skepticism and even suspicion, perhaps because of the excesses of the Internet bubble. Apple, Microsoft, Intel, Cisco, Yahoo and Google were all start-ups and these success stories show that the phenomenon is not mere speculation. The goal of this book is to show start-ups from a different angle. Start-ups are created by individuals who are passionate and who have dreams. Therefore this work should not only be read by specialists of innovation or by high tech entrepreneurs, but also by anyone interested in the history and economics of start-ups. The book is presented in two parts: it begins with a presentation of Silicon Valley start-ups, which ends with a description of the ecosystem of this region. The second part is dedicated to Europe, where the start-up phenomenon has failed in comparison.

The main message is that it is absolutely necessary to take more inspiration from Silicon Valley.

The House of Government Yuri Slezkine 2017-08-07 On the 100th anniversary of the Russian Revolution, the epic story of an enormous apartment building where Communist true believers lived before their destruction. The House of Government is unlike any other book about the Russian Revolution and the Soviet experiment. Written in the tradition of Tolstoy's *War and Peace*, Grossman's *Life and Fate*, and Solzhenitsyn's *The Gulag Archipelago*, Yuri Slezkine's gripping narrative tells the true story of the residents of an enormous Moscow apartment building where top Communist officials and their families lived before they were destroyed in Stalin's purges. A vivid account of the personal and public lives of Bolshevik true believers, the book begins with their conversion to Communism and ends with their children's loss of faith and the fall of the Soviet Union. Completed in 1931, the House of Government, later known as the House on the Embankment, was located across the Moscow River from the Kremlin. The largest residential building in Europe, it combined 505 furnished apartments with public spaces that included everything from a movie theater and a library to a tennis court and a shooting range. Slezkine tells the chilling story of how the building's residents lived in their apartments and ruled the Soviet state until some eight hundred of them were evicted from the House and led, one by one, to prison or their deaths. Drawing on letters, diaries, and interviews, and featuring hundreds of rare photographs, *The House of Government* weaves together biography, literary criticism, architectural history, and fascinating new theories of revolutions, millennial prophecies, and reigns of terror. The result is an unforgettable human saga of a building that, like the Soviet Union itself, became a haunted house, forever disturbed by the ghosts of the disappeared.

Wererat Jonathan Brazee 2013-05-12 Rafe comes from a long line of shifters. His father is a werewolf, and his mother is a weretiger. As he reaches puberty, he eagerly awaits his First Shift and finding out just what is his animal form. What powerful animal will complete him? Much to his disappointment, after going through the agony of his First Shift, Rafe discovers that he is not a wolf, tiger, or bear. He is not even a coyote or raptor, forms considered perhaps less prestigious in the tribe, but still acceptable. No, Rafe is a wererat, the only wererat in anyone's memory. Events work out to drive Rafe away from the tribe, to live out in the world at large. When he finally comes back for a visit, the tribe comes under attack from a group dedicated to eradicate all shifters from the face of the earth. The question is whether there is anything Rafe can do to help his tribe survive. Does he have value in a tribe of powerful shifters, or is exile the proper place for a genetic regression such as him?

Hell's Angels Hunter S. Thompson 2012-08-01 Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, *Hell's Angels* is a gripping portrait, and the best account we have of the truth behind an American legend.

Energy at the End of the World Laura Watts 2019-01-15 Making local energy futures, from marine energy to hydrogen fuel, at the edge of the world. The islands of Orkney, off the northern coast of Scotland, are closer to the Arctic Circle than to London. Surrounded by fierce seas and shrouded by clouds and mist, the islands seem to mark the edge of the known world. And yet they are a center for energy technology innovation, from marine energy to hydrogen fuel networks, attracting the interest of venture capitalists and local communities. In this book, Laura Watts tells a story of making energy futures at the edge of the world. Orkney, Watts tells us, has been making technology for six thousand years, from arrowheads and stone circles to wave and tide energy prototypes. Artifacts and traces of all the ages—Stone, Bronze, Iron, Viking, Silicon—are visible everywhere. The islanders turned to energy innovation when

forced to contend with an energy infrastructure they had outgrown. Today, Orkney is home to the European Marine Energy Centre, established in 2003. There are about forty open-sea marine energy test facilities in the world, many of which draw on Orkney expertise. The islands generate more renewable energy than they use, are growing hydrogen fuel and electric car networks, and have hundreds of locally owned micro wind turbines and a decade-old smart grid. Mixing storytelling and ethnography, empiricism and lyricism, Watts tells an Orkney energy saga—an account of how the islands are creating their own low-carbon future in the face of the seemingly impossible. The Orkney Islands, Watts shows, are playing a long game, making energy futures for another six thousand years.

Mrs. Keppel and Her Daughter Diana Souhami 2014-10-14 Alice Keppel, the married lover of Queen Victoria's eldest son and great-grandmother to Camilla Parker-Bowles, was a key figure in Edwardian society. Hers was the acceptable face of adultery. Discretion was her hallmark. It was her art to be the king's mistress and yet to laud the Royal Family and the institution of marriage. Formidable and manipulative, her attentions to the king brought her wealth, power, and status. Her daughter Violet Trefusis had a long tempestuous affair with the author and aristocrat Vita Sackville-West, during which Vita left her husband and two sons to travel abroad with Violet. It was a liaison that threatened the fabric of Violet's social world, and her passion and recalcitrance in pursuit of it pitted her against her mother and society. From memoirs, diaries, and letters, Diana Souhami portrays this fascinating and intense mother/daughter relationship in Mrs. Keppel and Her Daughter. Her story of these women, their lovers, and their lovers' mothers, highlights Edwardian - and contemporary - duplicity and double standards and goes to the heart of questions about sexual freedoms.

Northmen John Haywood 2016-09-27 From Finland to Newfoundland and Jelling to Jerusalem, follow in the wake of the Vikings—a transformative story of a people that begins with paganism and ends in Christendom. In AD 800, the Scandinavians were just barbarians in longships. Though they held sway in the north, their power meant little more than the ability to pillage and plunder, which they did to bolster their status at home. But as these Norse warriors left their strongholds to trade, raid, and settle across wide areas of Europe, Asia, and the North Atlantic, their violent and predatory culture left a unique imprint on medieval history. The twist that no one predicted, however, was a much slower, insidious takeover than any the Vikings would execute, and by a turn of the tide, they themselves became its target. For as they made their mark on Europe, Europe made its mark on them. By the year 1200, what remained of the Vikings' pagan origins floated beneath the surface and the strong, strange territories of the north had become a part of Latin Christendom. Northmen is there to tell the tale, to pay homage to what was lost and celebrate what was won. Focusing on key events, including the sack of Lindisfarne in 793 and the Battle of Stamford Bridge in 1066, medieval history expert John Haywood recounts the saga of the Viking Age, from the creation of the world through to the dwindling years of halfhearted raids and elegiac storytelling in the thirteenth century. He does so with meticulous research, engaging narrative, and sensitivity for his subject, shedding light and blood along the way.

Intercultural Modes of Philosophy, Volume One Eli Kramer 2021-08-30 Until rather recently, philosophy, when practiced as a way of life, was, for most, a communal enterprise of mutually reinforced personal cultivation. It is time, yet again, to revitalize this lost, but vital, intercultural mode of philosophy.

Conscience and Community Robert Alan Goldberg 2018 "Lowell Bennion, Sterling McMurrin, and Obert Tanner were friends and colleagues whose lives often intertwined. Professors at the University of Utah, these three scholars collaborated in addressing issues and events of their time; each influenced the thought and culture of Mormonism, helping to institute a new period of intellectual life and social activism. In Conscience and Community multiple scholars, family members, and others look at the private and public aspects of three lives and examine the roles they played in shaping their communities inside and out of their university and church. Lowell Bennion was founding director of the LDS Institute of Religion and professor of sociology at the University of Utah. He established multiple community service entities. Sterling McMurrin was a distinguished professor of philosophy and history, a graduate school dean, and former commissioner of education under JFK. He dismissed dogma and doctrine as barriers to a search for moral and spiritual understanding. Obert Tanner, also of the university's Philosophy Department, excelled in teaching and in business and became especially well known for philanthropy. The lives and work of these three men reveal the tensions between faith and reason, conscience and obedience. Their stories speak to us today because their concerns remain our concerns: racial justice, women's equality, gay rights, and the meaning of integrity and conscience"--Provided by publisher.

The Rough Guide to Los Angeles & Southern California Jeff Dickey 2013-10-24 This definitive guidebook to Los Angeles and Southern California features hundreds of reviews of the city's restaurants, hotels, nightlife, shops, and cinemas. Along with a thorough look at LA's top tourist areas, from Hollywood and Beverly Hills to Santa Monica and Disneyland, the guide explores more obscure but no less deserving sights, from Downtown's arts district to Santa Catalina Island. Additionally, the book covers the broader Southern California region, including

San Diego, Palm Springs and Santa Barbara. A full range of practical information for the visitor includes city transport and tours to costs and currency, while an in-depth contexts section details the region's colourful background, from its landmark architecture to the rise of the Hollywood film industry. Finally, individual sections highlight the region's top sights, as well as its beautiful beaches, and there are plenty of maps to help you plan your trip to this free-spirited American metropolis. Originally published in print in 2011. Now available in ePub format.

Those Who Leave and Those Who Stay Elena Ferrante 2014-09-02 Part of the bestselling saga about childhood friends following different paths by "one of the great novelists of our time" (The New York Times). In the third book in the New York Times–bestselling Neapolitan quartet that inspired the HBO series My Brilliant Friend, Elena and Lila have grown into womanhood. Lila married at sixteen and has a young son; she has left her husband and the comforts her marriage brought and now works as a common laborer. Elena has left the neighborhood, earned her college degree, and published a successful novel, all of which has opened the doors to a world of learned interlocutors and richly furnished salons. Both women are pushing against the walls of a prison that would have seen them living a life of misery, ignorance, and submission. They are afloat on the great sea of opportunities that opened up for women during the 1970s. And yet, they are still very much bound to each other in a book that "shows off Ferrante's strong storytelling ability and will leave readers eager for the final volume of the series" (Library Journal). "One of modern fiction's richest portraits of a friendship." —NPR

Green to Gold Daniel C. Esty 2009-01-09 From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour—environmental responsibility—from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least green-acquainted) companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys—watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood. For the responsible business leader, this volume provides plenty of (organic) food for thought. "

Data Science and Simulation in Transportation Research Janssens, Davy 2013-12-31 Given its effective techniques and theories from various sources and fields, data science is playing a vital role in transportation research and the consequences of the inevitable switch to electronic vehicles. This fundamental insight provides a step towards the solution of this important challenge. Contemporary Philosophical Proposals for the University Aaron Stoller 2018-02-12 This edited collection brings together a robust range of philosophers who offer theoretically and critically informed proposals regarding the aims, policies, and structures of the university. The collection fills a major gap in the landscape of higher education theory and practice while concurrently reviving a long and often forgotten discourse within the discipline of philosophy. It includes philosophers from across the globe representing disparate philosophical schools, as well as various career stages, statuses, and standpoints within the university. There is also a diversity in method, approach and style, which varies from personal narratives and case studies, to philosophical genealogies, to traditional philosophical essays, and to systematic theories. The collection can serve as a theoretical resource for critically minded administrators and faculty who wish to analyze and change policies and structures at their home institutions. It will introduce them to a wide range of possible educational imaginaries, as well as provide them with productive suggestions for pragmatic change on campuses.

Public Intellectualism and Sociopolitical Inquiry Through Metaphor and Musing Kenneth K Mwenda 2016-08-01 While this book does not purport or pretend to have all the answers to the many socio-political challenges that we face in life, it certainly does raise some thought-provoking questions for us to think through. I hasten to add, however, that the book is not a work of fiction. Rather, it is an example of public intellectualism in the Social Sciences. The book distills complex ideas into easily discernible ideas. Such is a cardinal objective of the book - to provoke some critical thinking on topical themes pertaining to socio-political inquiry. This objective is pursued through the use of metaphors and musings. In many cultures, especially those that place much emphasis on oral tradition, knowledge is often handed down to the younger generation through various adages, sayings, metaphors, musings and stories told by the elders to the younger folks around the fire-place. This book attempts to draw from such a tradition, lighting the fire-place and then distilling some untapped wisdom for posterity and the readership.

Most Treasured of All Gayle L. Teague 2015-09-23 I intend to leave this book my to children and grandchildren. I hope it is received in the same spirit that I give it. I love every one of them with all my heart. They are all precious individuals, and I am very proud of each one. May God bless them. Times have changed. I miss the 1940's when things were simple. Today kids are smarter than we were. They are on strange electronic games that I do not understand. I suspect they are addictive and perhaps even harmful, depending on content. The temptations today are many times more problematic than when I grew up. These young people are high-tech, intelligent, and far ahead of me at their age. They are all very smart and are, or will be, well educated. They show signs of becoming very successful in this world. However, my concerns are related to the spiritual side of life and reality. What about life hereafter? Have I

prepared them for the next life? I fear I have failed in that regard and I write in order to leave them something about God's word that may take up the slack in things where I have failed. I want to be sure that my kids and grandkids become believing, studious Christians as adults. If there is an afterlife, and I believe there is, it must be of great importance for all so, get ready, I believe we will all have an afterlife. We, in America, are fortunate in that we have freedom of religion and there are churches on every corner teaching the basic principles of our Lord and Savior. My Dad raised me on the bible and denominational doctrine because that's what he knew. He gave me a good start but I have discovered that there is much more to learn than denominational tradition. I believe an open mind is absolutely necessary and denominational training is a closed down system loyal to only one view. I want my children to study God's word. Unfortunately, many churches and church people do not study, but accept a particular traditional doctrine that has been handed down to them. I am now in my late seventies. I am not an academic and hold no degrees in theology. One might say I have a degree in hard knocks, experience, big mistakes, and corrections. I hope that my years of study and faith are enough. After years of doubting, study, research, and prayer I have come to believe that the bible is the most valuable word of wisdom on earth, The Most Treasured of All books on the planet. Very intelligent men and women have tried to disprove the bible but the more they attack, the better the old book looks. It is still the world's best seller. I believe we can base our whole life in this world and the life hereafter on the bible. I intend to convince my children and grandchildren of that, and I pray they read what I have left them.
