The Text Mining Handbook Ronen Feldman 2007 Text mining is a new and exciting area of computer science research that tries to solve the crisis of information overload by combining techniques from data mining, machine learning, natural language processing, information retrieval, and knowledge management. Similarly, link detection – a rapidly evolving approach to the analysis of text that shares and builds upon many of the key elements of text mining – also provides new tools for people to better leverage their burgeoning textual data resources. The Text Mining Handbook presents a comprehensive discussion of the state-of-the-art in text mining and link detection. In addition to providing an in-depth examination of core text mining and link detection algorithms and operations, the book examines advanced pre-processing techniques, knowledge representation considerations, and visualization approaches. Finally, the book explores current real-world, mission-critical applications of text mining and link detection in such varied fields as M&A business intelligence, genomics research and counter-terrorism activities.

Field & Stream 1971-04 FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

Handbook of African Medicinal Plants, Second Edition Maurice M. Iwu 2014-02-04 With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Morbidity and Mortality Weekly Report 2002-07

Clinical Guide to Exposure Therapy Jasper A. J. Smits 2022-09-14 Clinical Guide to Exposure Therapy provides evidence-based guidance on how to incorporate and tailor exposure therapy for patients who present with problems beyond fear and its disorders. Exposure therapy is a relatively easy-to-implement intervention with powerful effects. Helping clinicians expand their reach and effectiveness, this clinician's guide includes chapters on (1) considerations for deviating from standard exposure protocols when patients present with comorbid psychiatric or medical conditions and (2) how to use exposure therapy in the treatment of conditions that do not center on fear or anxiety (e.g., eating disorders, obesity, depression, substance use disorders, chronic pain). Complementing existing resources for clinicians on exposure therapy for the treatment of anxiety disorders, this volume provides guidance on issues related to the planning and implementation of exposure interventions more broadly. This clinical guide an essential resource for the advanced trainee and clinician providing exposure therapy for complex comorbidities and unique populations.

The Comparative Guide to American Suburbs David Garoogian 2001 The Comparative Guide to American Suburbs is a one-stop source for Statistics on the 2,000+ suburban communities surrounding the 50 largest metropolitan areas -- their population characteristics, income levels, economy, school system and important data on how they compare to one another. Organized into 50 Metropolitan Area chapters, each chapter contains an overview of the Metropolitan Area, a detailed Map followed by a comprehensive Statistical Profile of each Suburban Community, including Contact Information, Physical Characteristics, Population Characteristics, Income, Economy, Unemployment Rate, Cost of Living, Education, Chambers of Commerce and more. Next, statistical data is sorted into Ranking Tables that rank the suburbs by twenty different criteria, including Population, Per Capita Income, Unemployment Rate, Crime Rate, Cost of Living and more. The Comparative Guide to American Suburbs is the best source for locating data on suburbs. Those looking to relocate, as well as those doing preliminary market research, will find this an invaluable timesaving resource.

Sustainability Assessment of Urban Systems Claudia R. Binder 2020-02-29 Our world is becoming more urban. More than fifty percent of the global population now lives in cities, which poses new challenges for sustainable development. This book integrates theory and methods of sustainability assessment with concepts from systems science to provide guidelines for assessing the sustainability of urban systems. It discusses different aspects of urban sustainability, from energy and housing, to mobility and health, covering social, economic and environmental factors, as well as the various stakeholders and actors involved. The book argues for the need to find models and solutions in order to design sustainable cities of the future in light of the complexity of urban social life. Including diverse case studies from the developed and developing world, this book provides a useful reference for researchers and students from a broad range of disciplines working in the field of sustainability, as well as for environmental consultants and policy makers.

Scientific and Technical Books and Serials in Print 1989

Smart and Sustainable Planning for Cities and Regions Adriano Bisello 2018-04-25 This book comprises a selection of the top contributions presented at the second international conference “Smart and Sustainable Planning for Cities and Regions 2017”, held in March 2017 in Bolzano, Italy. Featuring forty-six papers by policy-makers, academics and consultants, it discusses current groundbreaking research in smart and sustainable planning, including the progress made in overcoming cities’ challenges towards improving the quality of life. Climate change adaptation and mitigation of global warming, generally identified as drivers of global policies, are just the “tip of the iceberg” when it comes to smart energy transition. Indeed, equally relevant towards this current transformation – and key topics in this volume – are ICTs, public spaces and society; next economy for the city; strategies and actions for good governance; urban-rural innovation; rethinking mobility. The book’s depth in understanding and insightfulness in re-thinking demonstrate the breaking of new ground in smart and sustainable planning. A new ground that policy-makers, academics and consultants may build upon as a bedrock for smart and sustainable planning.

The European Blood and Marrow Transplantation Textbook for Nurses Michelle Kenyon 2018-03-14 This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.

International Handbook of Health Literacy Okan, Orkan 2019-07-31 Available Open Access under CC-BY-NC license. Health literacy addresses a range of social dimensions of health including knowledge, navigation, communication as well as individual and organizational skills for accessing, understanding, evaluating and using of information. Especially over the past decade, health literacy has become a major public health concern globally as an asset for promoting health, wellbeing and sustainable development. This comprehensive handbook provides an invaluable overview of current international thinking about health literacy, highlighting cutting edge research, policy and practice in the field. With a diverse team of contributors, the book addresses health literacy across the life-span and offers insights from different populations and settings. Providing a wide range of major findings, the book outlines current discourse in the field and examines necessary future dialogues and new perspectives.

Cardiorespiratory Physiotherapy: Adults and Paediatrics Eleanor Main 2016-06-07 The fifth edition of this seminal textbook continues to provide those who are studying or are in practice with comprehensive evidence-based coverage of all the main aspects of respiratory and cardiac physiotherapy throughout the whole lifespan – neonates, infants, children, adolescents and adults – with the patient at centre and advocating a problem-based approach. For the new edition, Jennifer Pryor and Ammani Prasad hand the baton of editorship and their lasting legacy over to Eleanor Main and Linda Denehy. With a team of over 60 international expert authors, the new editors have incorporated major changes reflecting current cardiorespiratory physiotherapy education and practice. These changes are heralded by a new title – Cardiorespiratory Physiotherapy: Adults and Paediatrics (formerly Physiotherapy for Respiratory and Cardiac Problems: Adults and Paediatrics) – and a significant restructure of the content with a new set of chapters. A new key chapter on anatomy and physiology of the respiratory system lays the foundation which is then followed by a chapter on clinical assessment of adults, infants and children, and acutely ill or deteriorating patients. Additional new content includes a chapter on outcome measurement in practice and a large chapter describing rehabilitation in acute and chronic conditions in special populations including spinal cord injury, oncology, trauma and paediatrics. The chapter on therapeutic interventions is comprehensive and reflective of evidence based practice. Integrates evidence with clinical practice Case studies used to facilitate problem solving Boxes throughout highlighting key issues and points Emphasizes the need for a holistic approach to patient care Bank of 350 images on Evolve Resources. Log on to <https://evolve.elsevier.com/Main/cardiorespiratory> and register to access. Newly appointed editors – Eleanor Main (UK) and Linda Denehy (Australia) Content restructure and overhaul with contributions from over 60 world leading experts Chapters on: Anatomy and physiology of the respiratory system Clinical assessment of the adult, infant/child and the acutely ill/deteriorating patient Outcome measurement in practice Therapeutic interventions Managing special populations Over 180 new figures including additional full-colour photographs
